[Junk Raft](#) Dec 18 2021 -An exciting account of an activist scientist's unorthodox fight in the growing movement against plastic marine pollution and of his expedition across the Pacific on a home-made -junk raft- Over the past several years, the news media has brought the -Great Pacific Garbage Patch---the famous swirling gyre of plastic litter in the ocean--to the public consciousness. When Marcus Eriksen cofounded the 5 Gyres Institute with his wife, Anna, and set out to study marine pollution, they found that the reality is even more dire: instead of a stable mass of litter, they discovered that a -plastic smog- of microparticles permeates the world's oceans, defying simplistic clean-up efforts. What's more, these microplastics and their toxic chemistry have seeped into the food chain, threatening marine life and humans alike. Far from being a gloomy treatise on an environmental catastrophe, though, Junk Raft tells the exciting story of Eriksen's fight to raise awareness and solve the problem of plastic pollution, contributing to a fast-growing movement to stem the tide of trash. Eriksen writes of his voyage from Los Angeles to Hawaii aboard his homemade -junk raft,- and along the way he recounts the successful efforts to fight corporate influence and demand that plastics producers take responsibility for a problem they've created. Eriksen provides concrete, actionable solutions and an empowering message: it's up to bold, brash, unapologetically activist -citizen scientists- to challenge the status quo for the sake of the planet---

Global Justice Activism and Policy Reform in Europe Oct 24 2019 Civil society activism around issues of global justice has proliferated in Europe during the past two decades. Has such contestation and advocacy made a difference? This book examines whether and how the organizations, networks and campaigns involved have attained their policy objectives in the areas of debt relief, international trade, international taxation and corporate accountability. The analysis also considers the relationship between national and transnational activism. By comparing variations in the "activism-policy nexus" in France, Italy and the United Kingdom, it seeks to understand how such interaction and policy outcomes vary in different institutional and political contexts.

Rise Up Apr 29 2020 NOW A NATIONAL BESTSELLER WITH A NEW PREFACE BY THE AUTHOR " This man is a gift from God to the world. This book is a gift from Al Sharpton to us. Let ' s appreciate them both. " —Michael Eric Dyson Beginning with a foreword by Michael Eric Dyson, Rise Up is a rousing call to action for our nation, drawing on lessons learned from Reverend Al Sharpton ' s unique experience as a politician, television and radio host, and civil rights leader. Rise Up offers timeless lessons for anyone who ' s stood at the crossroads of their personal or political life, weighing their choices of how to proceed. When the young Alfred Charles Sharpton told his mother he wanted to be a preacher, little did he know that his journey would also lead him to prominence as a politician, founder of the National Action Network, civil rights activist, and television and radio talk show host. His enduring ability and willingness to take on the political power structure makes him the preeminent voice for the modern era, a time unprecedented in its challenges. In Rise Up, Reverend Sharpton revisits the highlights of the Obama administration, the 2016 election and Trump ' s subsequent hold on the GOP, and draws on his decades-long experience with other key players in politics and activism, including Shirley Chisholm, Hillary Clinton, Dr. Martin Luther King Jr. and more. The time has come to take a hard look at our collective failures and shortcomings and reclaim our core values in order to build a clear and just path forward for America. Our nation today stands at a crossroads—and change can ' t wait. " Full of history, honesty, and valuable suggestions, Rise Up should be a staple in every home, school and library as an essential primer on civil and political rights in America. " —Martin Luther King, III " If you want to learn how to use your voice to change a nation, you should study closely this man—and this book. " —Van Jones " My Bed-Stuy (do or die) brother has been at the forefront of our battles again and again. From way back in da way back to this present revolution the world is in now, Rev. has been about Black Lives Matter from the jump, also at a time when it was not the most popular or hip thing to be about. I look forward, standing next to him, to see, to witness this new energy, this new day that is about to be in these United States of America. " —Spike Lee Don't miss Rev. Sharpton's new book, Righteous Troublemakers: Untold Stories of the Social Justice Movement in America.

The Rise of Lifestyle Activism Feb 26 2020 This book explores changes in the values and ideas of a large part of the political Left in recent decades. The author identifies that a questioning of the merits of economic growth; an ideal of environmental sustainability overriding the old radical visions of material abundance; a critique of instrumental reason; a suspiciousness towards universalist claims; and an attachment to subjective and pluralistic identities, have been dominant in the narratives of the Leftist milieu and of social movements. Yet the author suggests that such changes, known as ' lifestyle activism ' , could be understood in a different way, one characterised by suspiciousness towards the belief that human action guided by reason can lead society towards a future that will be better and more affluent. Using a range of case studies from the 1960's to the present day anti-austerity movement, Sotirakopoulos argues that the New Left and its ideological heirs could be understood not so much as a continuation, but as an inversion from the Old Left and, most importantly, from humanistic visions of modernity. The book will therefore be ideal reading for students and researchers of political sociology, radical politics, modern political ideologies, contentious politics and political theory and to scholars of new social movements and the New Left.

[Politics and Revolution in Egypt](#) Mar 29 2020 In the years since the 2011 revolutions, Egypt and the Arab countries in general have moved from a profound moment of hope and democratic potential to deepened authoritarianism and outright war. Among the many political actors who have seen their political prospects rise and fall are youth activists, the revolutionary vanguard who spearheaded the transition process. This book offers a detailed analysis of Egypt's revolutionary youth as a collective and non-institutionalized political actor since 2005, bringing forth in particular the organizational, ideational, and strategic dimensions of the social movement. It offers insights into the origins of the movement and its evolution over time, the activists' claims and objectives, and the rationale behind their actions/interactions in the greater political arena. Proposing a theoretical framework that lies at the nexus of practice theory and social movement theory, the book demonstrates how the foundational practices of "youth" and "revolutionary" acted as the movement's internal culture, shaping the activists' claims and goals, their organizational structures, and their choice of strategies and repertoires of contention. In the context of a defunct Arab Spring and the region's descent into deepened authoritarianism and ultra-violent conflict, the book sheds light on the Egyptian uprising and the reasons for its increasingly grim outcome by providing a detailed analysis of one of its key players and both the exogenous and endogenous reasons why the revolutionary youth activists failed to achieve their goals. As the first book to assess the revolutionary youth as a social movement distinct from other forms of activism and other youth groups/parties in Egypt, it will be a valuable resource for anyone with an interest in Middle East Studies, the Arab Spring, or social movements more generally.

[Environmental Activism and the Maternal: Mothers and Mother Earth in Activism and Discourse](#) Jun 19 2019 This anthology seeks to explore the complex, varied, and sometimes contradictory intersections between mothers, mothering, and environmental activism in discourse and in lived experiences. It is intended to look critically, and yet hopefully, at the ways in which feminist, Indigenous, and environmentalist challenges to the western, capitalist moral imagination are linked. It explores the reach of rape culture and the ways in which a capitalist, patriarchal society interacts with the earth as a feminine-personified identity. It also shares the hope available to all women through raising a coming generation and the great power to effect change. This work endeavours to share lessons from the Earth in resistance to the continued assaults of anthropogenic capitalist industry, and to inspire new ways to course-correct, to resist, to rise up, to create differently, and to foster evolution and revolution as mothers, as women, and as hearts and minds. This volume is curated to be a space for critical discussion about representations linking environmental activism, maternity, and "mother earth," as well as a venue for creative expression and art. In keeping with its intention to provide a space for discussion of a complex and varied array of perspectives on mothers, mothering, and mother earth, this is an interdisciplinary anthology. Contributions included hail from a wide range of disciplines and fields including psychology, sociology, anthropology, women's and gender studies, cultural studies, literary studies, as well as law and legal studies. Contributions from scholars working in the fields of social science are interwoven with creative contributions from academics, writers, and artists working in fields in the humanities.

The Activist Academic Jul 21 2019 Donald Trump 's election forced academics to confront the inadequacy of promoting social change through the traditional academic work of research, writing, and teaching. Scholars joined crowds of people who flooded the streets to protest the event. The present political moment recalls intellectual forbearers like Antonio Gramsci who, imprisoned during an earlier fascist era, demanded that intellectuals committed to justice "can no longer consist in eloquence ... but in active participation in practical life, as constructor, organizer, 'permanent persuader' and not just a simple orator" (Gramsci, 1971, p. 10). Indeed, in an era of corporate media and "alternative facts," academics committed to justice cannot simply rely on disseminating new knowledge, but must step out of the ivory tower and enter the streets as activists. The Activist Academic serves as a guide for merging activism into academia. Following the journey of two academics, the book offers stories, frameworks and methods for how scholars can marry their academic selves, involved in scholarship, teaching and service, with their activist commitments to justice, while navigating the lived realities of raising families and navigating office politics. This volume invites academics across disciplines to enter into a dialogue about how to take knowledge to the streets. Dear Chairman Apr 22 2022 A sharp and illuminating history of one of capitalism 's longest running tensions—the conflicts of interest among public company directors, managers, and shareholders—told through entertaining case studies and original letters from some of our most legendary and controversial investors and activists. Recent disputes between shareholders and major corporations, including Apple and DuPont, have made headlines. But the struggle between management and those who own stock has been going on for nearly a century. Mixing never-before-published and rare, original letters from Wall Street icons—including Benjamin Graham, Warren Buffett, Ross Perot, Carl Icahn, and Daniel Loeb—with masterful scholarship and professional insight, Dear Chairman traces the rise in shareholder activism from the 1920s to today, and provides an invaluable and unprecedented perspective on what it means to be a public company, including how they work and who is really in control. Jeff Gramm analyzes different eras and pivotal boardroom battles from the last century to understand the factors that have caused shareholders and management to collide. Throughout, he uses the letters to show how investors interact with directors and managers, how they think about their target companies, and how they plan to profit. Each is a fascinating example of capitalism at work told through the voices of its most colorful, influential participants. A hedge fund manager and an adjunct professor at Columbia Business School, Gramm has spent as much time evaluating CEOs and directors as he has trying to understand and value businesses. He has seen public companies that are poorly run, and some that willfully disenfranchise their shareholders. While he pays tribute to the ingenuity of public company investors, Gramm also exposes examples of shareholder activism at its very worst, when hedge funds engineer stealthy land-grabs at the expense of a company 's long term prospects. Ultimately, he provides a thorough, much-needed understanding of the public company/shareholder relationship for investors, managers, and everyone concerned with the future of capitalism.

Remembering Social Movements Feb 20 2022 Remembering Social Movements offers a comparative historical examination of the relations between social movements and collective memory. A detailed historiographical and theoretical review of the field introduces the reader to five key concepts to help guide analysis: repertoires of contention, historical events, generations, collective identities, and emotions. The book examines how social movements act to shape public memory as well as how memory plays an important role within social movements through 15 historical case studies, spanning labour, feminist, peace, anti-nuclear, and urban movements, as well as specific examples of 'memory activism' from the 19th century to the 21st century. These include transnational and explicitly comparative case studies, in addition to cases rooted in German, Australian, Indian, and American history, ensuring that the reader gains a real insight into the remembrance of social activism across the globe and in different contexts. The book concludes with an epilogue from a prominent Memory Studies scholar. Bringing together the previously disparate fields of Memory Studies and Social Movement Studies, this book systematically scrutinises the two-way relationship between memory and activism and uses case studies to ground students while offering analytical tools for the reader.

Yakama Rising Jul 25 2022 The Yakama Nation of present-day Washington State has responded to more than a century of historical trauma with a resurgence of grassroots activism and cultural revitalization. This pathbreaking ethnography shifts the conversation from one of victimhood to one of ongoing resistance and resilience as a means of healing the soul wounds of settler colonialism. Yakama Rising: Indigenous Cultural Revitalization, Activism, and Healing argues that Indigenous communities themselves have the answers to the persistent social problems they face. This book contributes to discourses of Indigenous social change by articulating a Yakama decolonizing praxis that advances the premise that grassroots activism and cultural revitalization are powerful examples of decolonization. Michelle M. Jacob employs ethnographic case studies to demonstrate the tension between reclaiming traditional cultural practices and adapting to change. Through interviewees ' narratives, she carefully tacks back and forth between the atrocities of colonization and the remarkable actions of individuals committed to sustaining Yakama heritage. Focusing on three domains of Indigenous revitalization—dance, language, and foods—Jacob carefully elucidates the philosophy underlying and unifying each domain while also illustrating the importance of these practices for Indigenous self-determination, healing, and survival. In the impassioned voice of a member of the Yakama Nation, Jacob presents a volume that is at once intimate and specific to her home community and that also advances theories of Indigenous decolonization, feminism, and cultural revitalization. Jacob 's theoretical and methodological contributions make this work valuable to a range of students, academics, tribal community members, and professionals, and an essential read for anyone interested in the ways that grassroots activism can transform individual lives, communities, and society.

Arab Women's Activism and Socio-Political Transformation Sep 22 2019 This book illustrates how Arab women have been engaging in three ongoing, parallel struggles, before, during, and after the Arab Spring, on three levels, namely: the political struggle to pave the road for democracy, freedom, and reform; the social struggle to achieve gender equality and fight all forms of injustice and discrimination against women; and the legal struggle to chart new laws which can safeguard both the political and the social gains. The contributors argue that while the political upheavals were oftentimes more prevalent and visible, they should not overshadow the parallel social and legal revolutions which are equally important, due to their long-term impacts on the region. The chapters shed light on the intersections, overlaps and divergences between these simultaneous, continuous gendered struggles and unpacks their complexities and multiple implications, locally, regionally, and internationally, across different countries and through different phases.

Red Power Rising Jun 24 2022 During the 1960s, American Indian youth were swept up in a movement called Red Power—a civil rights struggle fueled by intertribal activism. While some define the movement as militant and others see it as peaceful, there is one common assumption about its history: Red Power began with the Indian takeover of Alcatraz in 1969. Or did it? In this groundbreaking book, Bradley G. Shreve sets the record straight by tracing the origins of Red Power further back in time: to the student activism of the National Indian Youth Council (NIYC), founded in Gallup, New Mexico, in 1961. Unlike other 1960s and '70s activist groups that challenged the fundamental beliefs of their predecessors, the students who established the NIYC were determined to uphold the cultures and ideals of their elders, building on a tradition of pan-Indian organization dating back to the early twentieth century. Their cornerstone principles of tribal sovereignty, self-determination, treaty rights, and cultural preservation helped ensure their survival, for in contrast to other activist groups that came and went, the NIYC is still in operation today. But Shreve also shows that the NIYC was very much a product of 1960s idealistic ferment and its leaders learned tactics from other contemporary leftist movements. By uncovering the origins of Red Power, Shreve writes an important new chapter in the history of American Indian activism. And by revealing the ideology and accomplishments of the NIYC, he ties the Red Power Movement to the larger struggle for human rights that continues to this day both in the United States and across the globe.

Women's Activism and Social Change Aug 22 2019 In Women's Activism and Social Change, Nancy A. Hewitt challenges the popular belief that the lives of antebellum women focused on their role in the private sphere of the family. Examining intense and well-documented reform movements in nineteenth-century Rochester, New York, Hewitt distinguishes three networks of women's activism: women from the wealthiest Rochester families who sought to ameliorate the lives of the poor; those from upwardly mobile families who, influenced by evangelical revivalism, campaigned to eradicate such social ills as slavery, vice, and intemperance; and those who combined limited economic resources with an agrarian Quaker tradition of communalism and religious democracy to advocate full racial and sexual equality.

Shareholder Democracy Mar 09 2021 This book offers a succinct, practical guide for understanding what some have referred to as shareholder democracy & efforts to facilitate and increase shareholder voting power within the corporation. In the past few years there has been a surge in shareholder activism that has had a profound impact on the corporation.

Shareholders and other activists have sought to increase shareholder voting power within the corporation based largely on the belief that increasing shareholder power will increase director and officer accountability, thereby helping to curb corporate misconduct and improve corporate performance. However, there is intense debate regarding whether increased shareholder power can achieve such objectives and whether increased shareholder power will negatively impact the corporation. This book is the first to provide a concise, but comprehensive look at the various ways in which shareholders have sought to enhance their voting power and influence within the corporation. In addition to examining shareholder activism, this book highlights and analyzes the debate regarding the propriety of increased shareholder power. This book also analyzes the impact of recent developments aimed at facilitating shareholder power such as majority voting, say on pay, and proxy access. This book will serve as a useful tool not only for those who desire a straight-forward analysis of shareholder rights and activism, but also for those seeking a reference guide on an issue of growing importance to corporate law and corporate governance.

Black Youth Rising Oct 28 2022 The authors, one an urban public school teacher in Boston and the other a professor of education at Boston College, define and articulate the idea of alienated teaching and offer a means to counter it. Alienated teaching is what teachers do when they feel that they must comply with external conditions that they have not chosen and from which they inwardly dissent because they do not believe that new policies and reforms serve their students well. Funded by a grant from the Boston Collaborative Fellows, the authors examine the effects of top-down policy mandates on classroom teachers. Mindful teaching is a way for teachers to learn how to incorporate appropriately, reforms and mandates into their practice. Mindful teaching promotes openness to new ideas and new perspectives via discussion in a collegial group committed to teacher inquiry. It promotes quiet and thoughtful articulation about professional commitment and beliefs. The authors are strong proponents of teachers becoming teacher leaders in order to work through the issues of mandates, teaching to the test, etc.

Fighting to Breathe Dec 06 2020 Industrial toxic emissions on the South Baltimore Peninsula are among the highest in the nation. Because of the concentration of factories and other chemical industries in their neighborhoods, residents face elevated rates of lung cancer and other respiratory illnesses in addition to heart attacks, strokes, and cardiovascular disease, all of which can lead to premature death. Fighting to Breathe follows a dynamic and creative group of high school students who decided to fight back against the race- and class-based health disparities and inequality in their city. For more than a decade, student organizers stood up to unequal land use practices and the proposed construction of an incinerator and instead initiated new waste management strategies. As a Baltimore resident and activist-scholar, Nicole Fabricant documents how these young organizers came to envision, design, and create a more just and sustainable Baltimore.

Shareholder Activism and the Law Nov 05 2020 This book provides a complete framework for contemporary shareholder activism and its implications for US corporate governance, which is based on director primacy theory. Under director primacy theory, shareholders do not wish to be involved in the management of the company; in the rare event that they wish to be involved, it is considered a transfer of power from the board of directors to shareholders, which in turn reduces the efficiency of centralised decision-making in public companies. However, this book demonstrates that shareholders do not use their power to transfer corporate control from the board to themselves, and that some form of shareholder activism is even collaborative, which is a new paradigm for US corporate governance. This book shows that while monitoring remains a key contribution of shareholders, they also bring new informational inputs to corporate decision-making that could not be obtained under the traditional board model. Accordingly, contemporary shareholder activism enhances the board's decision-making and monitoring capacity, without undermining the economic value of the board's authority. Therefore, this book argues that the complete approach of contemporary shareholder activism should be accommodated into US corporate governance. In doing so, this book considers not only legal and regulatory developments in the wake of the 2007 – 2008 financial crisis, but also the governance developments through by-law amendments. Furthermore, the author makes several recommendations to soften the current director primacy model: establishing a level playing field for private ordering, adopting the proxy access default regime, the majority voting rule, the universal proxy rules, and enhancing the disclosure requirements of shareholders. The book will be of interest to academics and students of corporate governance, both in the US and internationally.

Rise Up! Dec 26 2019 We live at a time when the need for resistance has come front and center to international consciousness. Rise Up! Activism as Education works to advance theory and practice-oriented understandings of multiple forms of and relationships between racial justice activism and diverse and transnational educational contexts. Here contributors provide detailed accounts and examinations—historical and contemporary, local and international—of active resistance efforts aimed at transforming individuals, institutions, and communities to dismantle systems of racial domination. They explore the ways in which racial justice activism serves as public education and consciousness-raising and a form of education and resistance from those engaged in the activism. The text makes a case for activism as an educational concept that enables organizers and observers to gain important learning outcomes from on-the-ground perspectives as it explores racial justice activism, specifically in the context of community and campus activism, intersectional activism, and Black diasporic liberation. This volume is an essential handbook for preparing both students and activists to effectively resist.

The Rise of Women's Transnational Activism Jan 19 2022 What characterised women's international co-operation in the interwar period? How did female activists from different countries and continents relate to one another? Marie Sandell here explores the changing experiences of women involved in the major international women's organisations - including the International Council of Women, International Alliance of Women, Women's International League for Peace and Freedom, and the International Federation of University Women - as well as the changing compositions and aims of the organisations themselves. Moving beyond an Anglo-American focus, Sandell analyses what the term 'international sisterhood' meant in this broader context, which for the first time included women from the beyond the Western world. Focusing on shifting identities, this book investigates how notions of 'sisterhood' were played out, and contested, during the interwar period and will be invaluable reading for scholars of women's history and twentieth-century world history.

The Four Pivots Sep 03 2020 " Reading this courageous book feels like the beginning of a social and personal awakening...I can't stop thinking about it. " —Bren é Brown, PhD, author of Atlas of the Heart For readers of Emergent Strategy and Dare to Lead, an activist's roadmap to long-term social justice impact through four simple shifts. We need a fundamental shift in our values—a pivot in how we think, act, work, and connect. Despite what we've been told, the most critical mainspring of social change isn't coalition building or problem analysis. It's healing: deep, whole, and systemic, inside and out. Here, Shawn Ginwright, PhD, breaks down the common myths of social movements—a set of deeply ingrained beliefs that actually hold us back from healing and achieving sustainable systemic change. He shows us why these frames don't work, proposing instead four revolutionary pivots for better activism and collective leadership: Awareness: from lens to mirror Connection: from transactional to transformative relationships Vision: from problem-fixing to possibility-creating Presence: from hustle to flow Supplemented with reflections, prompts, cutting-edge research, and the author's own insights and lived experience as an African American social scientist, professor, and movement builder, The Four Pivots helps us uncover our obstruction points. It shows us how to discover new lenses and boldly assert our need for connection, transformation, trust, wholeness, and healing. It gives us permission to create a better future—to acknowledge that a broken system has been predefining our dreams and limiting what we allow ourselves to imagine, but that it doesn't have to be that way at all. Are you ready to pivot?
