The Guide to COIL Virtual Exchange Oct 24

2019 This is the authoritative guide to implementing COIL Virtual Exchange, conceived, and co-edited by one of the originators of this innovative approach to internationalization, Jon Rubin. COIL, the acronym for Collaborative Online International Learning, is a central modality of what has come to be known as virtual exchange. Since its first iteration in 2002, it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research. COIL Virtual Exchange at its most essential is a bilateral online exchange involving the integration of existing courses across two, or sometimes more, institutions that are geographically and/or culturally distinct. To launch a COIL VE course, the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country. Together, their students engage and develop joint projects, usually over a continuous five to eight-week period. Compared to the limited number of students worldwide who can engage in study abroad, COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students, involves them in rigorous disciplinary and interdisciplinary studies, and promotes close and constructive engagement with students with different cultural perspectives. While many COIL courses are launched by individual instructors, based on their research connections and online outreach, they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development. This comprehensive guide covers COIL VE pedagogy, provides examples of what takes place in the COIL classroom, and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum. It addresses how institutional stakeholders, especially those in leadership positions, can develop and embed a successful COIL initiative at their institution. It offers varied perspectives

of COIL viewed from different institutional and cultural vantage points -- from research universities, community and technical colleges, and university systems -- and describes how COIL VE is developing in five different world regions, presenting eleven case studies. The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE. Additionally, the book provides links to the COIL Connect for Virtual Exchange website (<https://coilconnect.org>) which includes an updated directory of organizations, an expanding database of faculty and institutions participating in COIL and looking for partners, course templates, survey data, and case studies. This book offers faculty and administrators across the world -- whether formally involved in international education, in service-learning and community engagement, or wanting to incorporate a cross-cultural perspective in their disciplinary courses -- theoretical foundations, guidance on effective collaboration, and the strategic and pedagogical considerations to develop robust COIL VE courses and programs.

Ø Changes to the CISSP Certification pre-requisites will result in an increase in the popularity of the SSCP certification. Recently the (ISC)2 increased the work experience requirement of the CISSP certification to four years from three years. This increase will result into current candidates for the CISSP to shift to the SSCP certification, as the verifiable field requirement is only one year. Ø Syngress well-positioned in wide open playing field. The landscape of certification publishing has changed dramatically over the past month with Coriolis ceasing operations, Hungry Minds facing an uncertain future after their acquisition by John Wiley & Sons, and Syngress ending its

long-term relationship with Osborne McGraw Hill in pursuit of publishing Study Guides independently. We are confident that Syngress' long history of best-selling Study Guides will continue in this new era.

*Academic Leadership and Governance of Higher Education* Dec 26 2019 Winner of the 2012 ASHE/CAHEP Barbara Townsend Lecture Award To prosper and thrive in an increasingly unpredictable national and global environment, U.S. higher education will need to adapt, innovate, and evolve once again, as it has during every major societal change over the past four centuries. The purpose of this new edition, published a turbulent decade after the first, is to provide institutional leaders -- from department chairs to trustees -- with a broad understanding of the academic enterprise, strategic guidance, and key principles, to assist them in navigating the future and drive the success of their institutions as they confront the unimagined. Recognizing that the hallmark of higher education in the U.S. is the diversity of institution types, each of which is affected differently by external and internal influences, the authors provide examples and ideas drawn from the spectrum of colleges and universities in the not-for-profit sector. This book covers the major functions and constituent departments and units within institutions; the stakeholders from students and faculty through the echelons

of administration; the external environment of elected officials, foundations, philanthropists, and the new changing media; and innovations in teaching, technology, data analytics, legal frameworks, as well as economic, demographic, and political pressures. The book is informed by the proposition that adhering to four principles--which the authors identify as having enabled institutions of higher education to successfully navigate ever-changing and volatile pasts--will enable them to flourish in the coming decades: The four principles are: 1. Be mission centric by making all key decisions based on a core mission and set of values. 2. Be able to adapt to environmental change in alignment with the mission and core values. 3. Be committed to democratic ideals by seeking to promote them and modeling democratic practices on and off campus. 4. Be models for inclusion, equity, and positive social change.
