Financial Regulation in Crisis? Aug 22 2019 The depositor run on the Northern Rock bank in September 2007, which led to the bank's subsequent nationalization was the first run on a UK bank for nearly 150 years and was a seminal moment in the unfolding global financial crisis. This book provides a detailed legal analysis of the role played by financial law and regulation during this event, and the impact the episode made on the law. The contributors to the book explore and elaborate upon the legal technique of securitization, and how Northern Rock itself created and employed securitized financial assets. There is also in-depth discussion and analysis of the origin of the problems experienced in the wholesale interbank markets surrounding the Northern Rock crisis. Chapters focus on risk-based financial regulation, depositor protection, and bank rescue and resolution mechanisms in the UK before and after the Northern Rock crisis. State aid implications of the nationalization

of Northern Rock, and the future of financial regulation are also considered. This timely new book will appeal to academics, postgraduate and undergraduate students in law and business schools as well as practitioners, regulators and lawmakers.

EU Strategies on Governance Reform Dec 26 2019 This book discusses the European Union's approach to governance reform in its development assistance relationships with various groups of developing countries. A group of expert authors outline the general features of the position on governance taken by the EU, which is currently the major multilateral donor of development assistance, and discuss the implementation of EU policies in a set of cases: the group of African, Caribbean and Pacific (ACP) states, the New Partnership for Africa's Development (NEPAD), Southeastern Europe, Central Asia, the Euro-Mediterranean, Latin America and fragile states. The contributions to the book argue that the EU's position on governance reform, particularly since the adoption of the European Consensus on Development in 2005, has had distinctly neoliberal overtones. The EU's governance-related strategies have been instrumental to deepening market-based reform in aid-receiving countries. Policies on state-building adopted by the EU reflect mainly the interests of and ideas embraced by the EU and its member states. To an important extent, the rhetoric accompanying EU policies does not match with the political and social dynamics inherent in governance structures on the ground in many of its aid-recipient partner countries. This book was published as a special issue of Third World Quarterly.

Desert Kingdoms to Global Powers Aug 14 2021 An expert in Arab Gulf politics offers a revealing analysis of the region's stunning rise to global power and the challenges it confronts today. Once just sleepy desert sheikdoms, the Arab Gulf states of Saudi Arabia,

Oman, the United Arab Emirates, Qatar, Bahrain, and Kuwait now exert unprecedented influence on international affairs—the result of their almost unimaginable riches in oil and gas. In this accessible study, Gulf politics expert Rory Miller examines the achievements of these countries since the 1973 global oil crisis. He also investigates how the shrewd Arab Gulf rulers who have overcome crisis after crisis meet the unpredictable future. The Arab Gulf region has become a global hub for travel, tourism, sports, culture, trade, and finance. But can the autocratic regimes maintain stability at home and influence abroad as they deal with the demands of social and democratic reform? Miller considers an array of factors—Islamism, terrorism, the Arab Spring, volatile oil prices, global power dynamics, and others—to assess the region's future possibilities.

Implications of the Global Financial Crisis for Financial Reform and Regulation in Asia Nov 17 2021 'Filled with fresh observations from the global financial crisis, this book provides a blueprint for making Asia's financial systems safe. With contributions from experts in several countries, it is both comprehensive and rigorous. It will be invaluable to policy makers and students of finance everywhere, but its unique Asian perspective provides special insight into the systems that managed to ride out the global crisis but absent further reform might set the stage for another one. The book's analysis and recommendations deserve urgent policy attention.' Peter Petri, Brandeis University, US 'What are the lessons of the global financial crisis of 2007/2009 for Asia? This is a key issue for Asia today. On one hand, some observers argue that following the Asian financial crisis in 1997/98, most Asian developing countries built up strong mechanisms to guarantee financial stability. But the recent financial shocks across America and Europe show that

even the best financial systems have key weaknesses. This book is a valuable guide for Asian financial policy-makers of the road ahead.' Peter McCawley, Australian National University In light of the experience of the global financial crisis, this book develops concrete recommendations for financial sector reform and regulation in Asian economies aimed at preventing the recurrence of systemic financial crises, improving the ability to manage and resolve crises, managing capital flows, and promoting the development of Asian bond markets. The focus of the book is on longer-term structural measures. It explores areas such as the scope for regional monitoring and cooperation; deepening and integration of Asian bond and money markets; liberalization/regulation of capital flows; issues related to macroprudential oversight, regulatory structure and cooperation; as well as role of state intervention in crisis resolution in the financial sector. The need for and impacts of regulations on innovative financial products and specific investor groups such as hedge funds; ways to reduce systemic risk of pro-cyclicality of regulation; and ways to improve the infrastructure and regulatory environment for local currency bond markets, are also examined in depth. The book will appeal to public and private finance experts, policy and decisions makers in governments and banks, think-tanks, and students in graduate courses related to financial and economic development.

The European Union and Central Asia Oct 04 2020 In June 2007, the Council of the European Union (EU) adopted The EU in Central Asia: Strategy for a New Partnership, highlighting the growing importance of Central Asia to the EU. This book examines the EU's policy towards the five Central Asian states of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan in light of this Strategy. The analysis focuses on the EU's Central Asia Strategy and provides an evaluation of the EU's performance in meeting its policy goals in the region. It starts by looking at the EU as an actor, and discusses the general framework of EU-Central Asia cooperation. The book goes on to focus on the Strategy's general strategic directions and, in particular, its set of concrete policy commitments and questions whether these are adequately designed and implemented so they are able to contribute to regional security and stability. The book contributes to a better understanding for the pitfalls of overall stability in Central Asia, as well as studies on European Union and International relations.

International Economic Law, Globalization and Developing Countries Oct 24 2019 This book is both breathtaking in its scope and impressive in its attention to legal and institutional detail in situating developing countries in the evolving body of international economic law. Essays in this volume canvas most important areas of international economic law, including international trade law, international financial regulation, the regulation of foreign direct investment and multinational corporations, foreign aid, the enforcement of human rights standards and core international labour standards on multinational corporations, international enforcement of anti-corruption conventions, international competition law, international intellectual property rights, and international environmental law. A pervasive theme, compellingly developed, in most of these papers is the asymmetric structure of international institutions that generate rules in these various areas, in which developing countries are mostly rule takers, rather than equal participants. The current global financial crisis may provide a welcome opportunity for re-evaluating these institutional asymmetries. In any such re-evaluation, this book will provide a veritable cornucopia of constructive new insights.

Adapt May 23 2022 Everything we know about solving the world's problems is wrong. Out: Plans, experts and above all, leaders. In: Adapting - improvise rather than plan; fail, learn, and try again In this groundbreaking new book, Tim Harford shows how the world's most complex and important problems - including terrorism, climate change, poverty, innovation, and the financial crisis - can only be solved from the bottom up by rapid

experimenting and adapting. From a spaceport in the Mojave Desert to the street battles of Iraq, from a blazing offshore drilling rig to everyday decisions in our business and personal lives, this is a handbook for surviving - and prospering - in our complex and ever-shifting world.

Insecure Gulf Feb 08 2021 Insecure Gulf examines how the concept of Arabian/Persian Gulf 'security' is evolving in response to new challenges that are increasingly non-military and longer-term. Food, water and energy security, managing and mitigating the impact of environmental degradation and climate change, addressing demographic pressures and the youth bulge and reformulating structural economic deficiencies, in addition to dealing with the fallout from progressive state failure in Yemen, require a broad, global and multi-dimensional approach to Gulf security. While 'traditional' threats from Iraq, Iran, nuclear proliferation and trans-national terrorism remain robust, these new challenges to Gulf security have the potential to strike at the heart of the social contract and redistributive mechanisms that bind state and society in the Arab oil monarchies. Insecure Gulf explores the relationship between 'traditional' and 'new' security challenges and situates them within the changing political economy of the GCC states as they move toward post-oil structures of governance. It describes how regimes are anticipating and reacting to the shifting security paradigm, and contextualizes these changes within the broader political, economic, social and demographic framework. It also argues that a holistic approach to security is necessary for regimes to renew their sources of legitimacy in a globalizing world.

Two Decades of Market Reform in India Jan 27 2020 Have neoliberal policies truly yielded beneficial effects for India? 'Two Decades of Market Reform in India' presents a collection of essays that challenge the conventional wisdom of Indian market reforms, examining the effects of neoliberal policies enacted by the Indian government and exploding the myths that surround them. In particular, the volume questions the perceived benefits of India's reform policies in the areas of growth, agriculture, industry and poverty alleviation, and examines how the government's focus on preventing a fiscal deficit caused a large-scale decline in development expenditures, which in turn has had a negative impact on the well-being of the poor. With its rich and insightful analysis, 'Two Decades of Market Reform in India' bravely shines a light on the true implications of India's neoliberal governmental policies, and provides a revealing indication of how policy reform since 1991 has, at times, detrimentally affected the general populace of India.
