Legal Knowledge Representation:Automatic Text Analysis in Public International and European Law
Aug 02 2020 This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science. A new method of automatic analysis of legal texts is presented in four case studies. Law is seen as an information system with legally formalised information processes. The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step: conceptual indexing and automatic analysis of texts. Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems. The concept-based model for semi-automatic analysis of legal texts provides this necessary connection. The knowledge base of descriptors, context-sensitive rules and meta-rules formalises properly all important passages in the text corpora for automatic analysis. Statistics and self-organising maps give assistance in knowledge acquisition. The result of the analysis is organised with automatically generated hypertext links. Four case studies show the huge potential but also some drawbacks of this approach.

Post-Transition Metals Jul 01 2020 Post-Transition Metals compiles information on synthesis, properties, characterization, and potential applications of post-transition metals such as indium and gallium. These metals are important for their optical, structural, morphological, and electronic properties. This book provides an overview of the history as well as the physical, structural, optical,

and chemical properties of post-transition elements. It also discusses methods for the detection and separation of these metals, including special methods for determining their presence in industrial and organometallic products. The information contained herein is useful for physicists, researchers, chemists, materials engineers, and students.

Power Quality in Microgrids Based on Distributed Generators Feb 26 2020 This book comprises ten articles covering different aspects of power quality issues in microgrids and distributed generation (DG) systems, including 1) Detection and estimation of power quality; 2) Modeling; 3) Harmonic control for DG systems and microgrids; 4) Stability improvements for microgrids. Different power quality phenomena and solution were studied in the included papers, such as harmonics, resonance, frequency deviation, voltage sag, and fluctuation. From a network point of view, some papers studied the harmonic and stability issues in standalone microgrids which are more likely to cause power quality problems. Other papers discussed the power quality problems in microgrids which are weakly interconnected with the main distribution grid. In view of the published papers, there is a trend that increasingly advanced modeling, analysis, and control schemes were applied in the studies. Moreover, the latest works focus not only on single-unit problems but also multiple units or network issues. Although some of the hot topics are not included, this book covers multiple aspects of the current power quality research frontier, and represents a particularly useful reference book for frontier researchers in this field.

Computergrafik und Bildverarbeitung Jul 25 2022 Im Buch „Computergrafik und Bildverarbeitung“ finden Sie alles, was Sie für Studium und Praxis über Generierung und Verarbeitung von digitalen Bildern wissen möchten und wie Sie es anwenden. Das erfolgreiche didaktische Konzept wurde weiterentwickelt und liegt ab dieser dritten Auflage in zwei Teilen vor. „Computergrafik und Bildverarbeitung“ Band I führt den Leser durch die Themen der Computergrafik. Dabei werden das alte und neue OpenGL parallel dargestellt, um einen guten Zugang für Einsteiger und einen leichteren Übergang für Fortgeschrittene zu gewährleisten. Profitieren Sie von dem kostenlosen Online-Service: Bildverarbeitungswerkzeuge, Beispiel-Software und interaktive Vorlesungen (als HTML-Seiten mit Java-Applets und Praktikumsaufgaben).

Recent Trends in Fluid Dynamics Research Feb 08 2021 This book presents select proceedings of Conference on Recent Trends in Fluid Dynamics Research (RTFDR-21). It signifies the current research trends in fluid dynamics and convection heat transfer for both laminar and turbulent flow structures. The topics covered include fluid mechanics and applications, microfluidics and nanofluidics, numerical methods for multiphase flows, cavitation, combustion, fluid-particle interactions in turbulence, biological flows, CFD, experimental fluid mechanics, convection heat transfer, numerical heat transfer, fluid power, experimental heat transfer, heat transfer, non-newtonian rheology, and boundary layer theory. The book also discusses various fundamental and application-based research of fluid dynamics, heat transfer, combustion, etc., by theoretical and experimental approaches. The book will be a valuable reference for beginners, researchers, and professionals interested in fluid dynamics research and allied fields.

Media and Society Jul 13 2021 *Media and Society: A Critical Perspective* is a lively, illustrated introduction to the role that the mass media play in our lives, our society, and American culture. Featuring updated examples and expanded material on media theories, ideology, and new technology, the third edition helps students understand their relationship with the media they encounter daily.

The 1914 Star to the Royal Navy and Royal Marines Mar 09 2021 The Royal Navy's entitlement to the 1914 Star was almost exclusively restricted to the RN Division though personnel from a few other minor units - including, for example, Sick Berth staff from HMS Pembroke - also qualified. To

qualify one had to have served in France/Belgium between 5th August and 22nd November 1914. This splendid work of research lists all those who were entitled to the Star, battalion by battalion, unit by unit. There is an excellent introduction giving the background to the formation of the RN Division and some of the arguments about RN entitlement to the star (the Admiralty was initially against it), and at the end there is a section devoted to the 'story' of the Star from the Navy's viewpoint based on selected extracts from the Admiralty case file. Here we can read correspondence between the King, Admiralty and the War Office, Fleet and Army Orders and Press releases. A fascinating document which shows there is more to it than meets the eye in the creation of a campaign medal.

Advances in Chemical Physics Mar 29 2020 The Advances in Chemical Physics series provides the chemical physics field with a forum for critical, authoritative evaluations of advances in every area of the discipline. • This is the only series of volumes available that presents the cutting edge of research in chemical physics • Includes 10 contributions from leading experts in this field of research • Contains a representative cross-section of research in chemical reaction dynamics and state of the art quantum description of intramolecular and intermolecular dynamics • Structured with an editorial framework that makes the book an excellent supplement to an advanced graduate class in physical chemistry, chemical physics, or molecular physics

Proceedings of 2nd International Conference on Intelligent Computing and Applications Oct 04 2020 Second International Conference on Intelligent Computing and Applications was the annual research conference aimed to bring together researchers around the world to exchange research results and address open issues in all aspects of Intelligent Computing and Applications. The main objective of the second edition of the conference for the scientists, scholars, engineers and students from the academia and the industry is to present ongoing research activities and hence to foster research relations between the Universities and the Industry. The theme of the conference unified the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in computational intelligence and bridges theoretical research concepts with applications. The conference covered vital issues ranging from intelligent computing, soft computing, and communication to machine learning, industrial automation, process technology and robotics. This conference also provided variety of opportunities for the delegates to exchange ideas, applications and experiences, to establish research relations and to find global partners for future collaboration.

Tyne Cot Cemetery and Memorial Aug 14 2021 This is a comprehensive and highly emotive volume, borne of years of intensive research and many trips to the battlefields of the Great War. It seeks to humanise Tyne Cot cemetery, to offer the reader a chance to engage with the personal stories of the soldiers whose names have been chiseled there in stone. Poignant stories of camaraderie, tragic twists of fate and noble sacrifice have been collated in an attempt to bring home the reality of war and the true extent of its tragic cost. It is hoped that visitors to the battlefields, whether their relatives are listed within or not, will find their experience enriched by having access to this treasure trove of stories.

Power Electronics for Renewable and Distributed Energy Systems Jan 07 2021 While most books approach power electronics and renewable energy as two separate subjects, Power Electronics for Renewable and Distributed Energy Systems takes an integrative approach; discussing power electronic converters topologies, controls and integration that are specific to the renewable and distributed energy system applications. An overview of power electronic technologies is followed by the introduction of various renewable and distributed energy resources that includes photovoltaics, wind, small hydroelectric, fuel cells, microturbines and variable speed generation. Energy storage systems such as battery and fast response storage systems are discussed along with application-specific examples. After setting forth the fundamentals, the chapters focus on more complex topics such as modular power electronics, microgrids and smart grids for integrating renewable and

distributed energy. Emerging topics such as advanced electric vehicles and distributed control paradigm for power system control are discussed in the last two chapters. With contributions from subject matter experts, the diagrams and detailed examples provided in each chapter make Power Electronics for Renewable and Distributed Energy Systems a sourcebook for electrical engineers and consultants working to deploy various renewable and distributed energy systems and can serve as a comprehensive guide for the upper-level undergraduates and graduate students across the globe.

Skeletonization Sep 15 2021 Skeletonization: Theory, Methods and Applications is a comprehensive reference on skeletonization, written by the world's leading researchers in the field. The book presents theory, methods, algorithms and their evaluation, together with applications. Skeletonization is used in many image processing and computer vision applications such as shape recognition and analysis, shape decomposition and character recognition, as well as medical imaging for pulmonary, cardiac, mammographic applications. Part I includes theories and methods unique to skeletonization. Part II includes novel applications including skeleton-based characterization of human trabecular bone micro-architecture, image registration and correspondence establishment in anatomical structures, skeleton-based fast, fully automated generation of vessel tree structure for clinical evaluation of blood vessel systems. Offers a complete picture of skeletonization and its application to image processing, computer vision, pattern recognition and biomedical engineering Provides an in-depth presentation on various topics of skeletonization, including principles, theory, methods, algorithms, evaluation and real-life applications Discusses distance-analysis, geometry, topology, scale and symmetry-analysis in the context of object understanding and analysis using medial axis and skeletonization

Das Echo, zur Unterhaltung für geselliges Leben Feb 20 2022

Der Schutz der Privatheit im Zivilrecht Sep 27 2022 English summary: The right to privacy is a fundamental constituent of personal freedom and autonomy. However the substance of this right as well as its relationship to other personal interests, such as reputation or personal identity, have not yet been defined. Analyzing German, American and English law, which has only recently recognized the right to privacy by incorporating the European Convention of Human Rights and Fundamental Freedoms into its own law, the author develops a modern approach to privacy based on the notion of informational self-determination. Recognizing the fact that personal information has become a valuable commodity in modern society, the author also discusses possible remedial consequences of an infringement of the right to privacy. German description: Das Recht auf Privatheit steht seit jeher im Zentrum des Persönlichkeitsschutzes. Als Recht auf Selbstbestimmung über die Preisgabe und Verwendung personenbezogener Informationen ist es wesentliche Bedingung der freien Entfaltung der Persönlichkeit. Inhalt und Aufgabe des Privatheitsschutzes haben sich allerdings im Zeitalter der Medien- und Informationsgesellschaft grundlegend verändert. Personenbezogene Informationen, zu denen neben den Einzelangaben über persönliche und sachliche Verhältnisse einer Person auch deren Persönlichkeitsattribute, wie Name, Bild oder Stimme zu zählen sind, erlangen heute zunehmend wirtschaftliche Bedeutung - die Persönlichkeit wird zur Ware. Eine Verletzung des Rechts auf Privatheit betrifft damit neben ideellen Integritätsinteressen häufig auch materielle Verwertungsinteressen. Die deutsche Lehre und Rechtsprechung tragen dem bislang nur unzureichend Rechnung. Vor dem Hintergrund des englischen und des US-amerikanischen Rechts erarbeitet Ulrich Amelung eine moderne Interpretation von Privatheit, die über den herkömmlichen Begriff der Privatsphäre inhaltlich und funktionell hinausweist. Hierauf aufbauend geht er der Frage nach, wem der Nutzen aus der zwangsweisen Verwertung privater Informationen gebührt. Auf der Grundlage der rechtsvergleichenden Untersuchungen entwickelt der Autor einen differenzierten Lösungsansatz, der den Schwerpunkt der Betrachtung vom Schadensersatz- auf das Bereicherungsrecht verlagert.

introductory and highly specialized books dealing with aspects of food biochemistry for undergraduate and graduate students, researchers, and professionals in the fields of food science, horticulture, animal science, dairy science and cereal chemistry. Now fully revised and updated, with contributing authors from around the world, the third edition of *Biochemistry of Foods* once again presents the most current science available. The first section addresses the biochemical changes involved in the development of raw foods such as cereals, legumes, fruits and vegetables, milk, and eggs. Section II reviews the processing of foods such as brewing, cheese and yogurt, oilseed processing as well as the role of non-enzymatic browning. Section III on spoilage includes a comprehensive review of enzymatic browning, lipid oxidation and milk off-flavors. The final section covers the new and rapidly expanding area of rDNA technologies. This book provides transitional coverage that moves the reader from concept to application. Features new chapters on rDNA technologies, legumes, eggs, oilseed processing and fat modification, and lipid oxidation. Offers expanded and updated material throughout, including valuable illustrations. Edited and authored by award-winning scientists.

Salute to Service Jan 27 2020 A study of the role of the RNZCT and its predecessors, the NZASC and the RNZASC. It examines the roles of those organisations within the army - transport, supply and catering - and tells the stories of the many thousands of New Zealanders who worked in them. Illustrated with black and white photographs. The author has written many books, including a biography of Ronald Hugh Morrieson.

The London, Edinburgh and Dublin Philosophical Magazine and Journal of Science Dec 06 2020

CCTV May 31 2020 Closed circuit television (CCTV) is experiencing a leap in technology using digital techniques and the Internet. The new edition of this high-level professional reference retains the particulars that made the first edition a success, including the details of CCD cameras, lenses, coaxial cables, fiber-optics, and system design, but it is expanded to cover all video compression techniques used in the ever increasing assortment of digital video recorders (DVRs) available on the market today. It also serves to clarify the technology of data networking. The theoretical section explains the various compression techniques, such as MPEG-1, MPEG-2, JPEG, Wavelet, H.261/263, JPEG-2000, MPEG-4, etc. Networking is also a new and unknown area for many CCTV installers and this is explained in a brand new section. The challenge of selecting the right system from such a wide variety of new technologies available in CCTV has been compounded by the advent of DVRs. This new edition of the book *CCTV* demystifies DVR technology. - Covers brand new digital video recorder (DVR) compression techniques, image quality, measuring and networking - Fully illustrated with dozens of photographs, tables, checklists, charts, diagrams and instructions - Encompasses CCTV standards for U.S., Europe, and Australia
