**Yearbook of the International Law Commission 2001, Vol.II, Part 2 Aug 23 2022** This volume contains the report of the International Law Commission on the work of its fifty-third session (23 April - 1 June and 2 July - 10 August 2001). The issues discussed at that session included: reservations to treaties, diplomatic protection, unilateral acts of States, state responsibility, and international liability for injurious consequences arising out of acts not prohibited by international law.

**Houben-Weyl Methods of Organic Chemistry Vol. I/2, 4th Edition Aug 31 2020** Houben-Weyl is the acclaimed reference series for preparative methods in organic chemistry, in which all methods are organized according to the class of compound or functional group to be synthesized. The Houben-Weyl volumes contain 146 000 product-specific experimental procedures, 580 000 structures, and 700 000 references. The preparative significance of the methods for all classes of compounds is critically evaluated. The series includes data from as far back as the early 1800s to 2003. // The content of this e-book was originally published in 1959.

**Report on the Scientific Results of the Voyage of H.M.S. Challenger During the Years 1873-76 Under the Command of Captain George S. Nares ... and the Late Captain Frank Tourle Thomson, R.N. Jan 16 2022**

**Fluorine in Heterocyclic Chemistry Volume 2 Oct 01 2020** This two-volume work combines comprehensive information on the chemistry of the fluorinated heterocycles. The material has been divided such that the first volume is dedicated to 5-membered fluorinated heterocycles and macrocycles, while the second volume combines data connected with the chemistry of fluorine containing 6-membered heterocycles. Both volumes will be of interest to synthetic organic chemists in general, and particularly for those colleagues working in the fields of heterocyclic-compound chemistry, materials chemistry, medicinal chemistry, and fluorine chemistry. All information is presented and classified clearly to be effective source for broad auditory of chemists. It will be interesting for scientists working in the field of inorganic and coordination chemistry. Fluorinated heterocycles are becoming increasingly important in many areas including the pharmaceutical industry, materials science and agriculture. The presence of fluorine can result in substantial functional changes in the biological as well as physicochemical properties of organic compounds. Incorporation of fluorine into drug molecules can greatly affect their physicochemical properties, such as bond strength, lipophilicity, bioavailability, conformation, electrostatic potential, dipole moment, pKa etc. as well as pharmacokinetic properties, such as tissue distribution, rate of metabolism and pharmacological properties, such as pharmacodynamics and toxicology.

**A history of art in ancient Egypt Vol.2 (of 2) (Illustrations) Aug 19 2019** The successful interpretation of the ancient writings of Egypt, Chaldaea, and Persia, which has distinguished our times, makes it necessary that the history of antiquity should be rewritten. Documents that for thousands of years lay hidden beneath the soil, and inscriptions which, like those of Egypt and Persia, long offered themselves to the gaze of man merely to excite his impotent curiosity, have now been deciphered and made to render up their secrets for the guidance of the historian. By the help of those strings of hieroglyphs and of cuneiform characters, illustrated by paintings and sculptured reliefs, we are enabled to separate the truth from the falsehood, the chaff from the wheat, in the narratives of the Greek writers who busied themselves with those nations of Africa and Asia which preceded their own in the ways of civilization. Day by day, as new monuments have been discovered and more certain methods of reading their inscriptions elaborated, we have added to the knowledge left us by Herodotus and Diodorus Siculus, to our acquaintance with those empires on the Euphrates and the Nile which were already in old age when the Greeks were yet struggling to emerge from their primitive barbarism. Even in the cases of Greece and Rome, whose histories are supplied in their main lines by their classic writers, the study of hitherto neglected writings discloses many new and curious details. The energetic search for ancient inscriptions, and the scrupulous and ingenious interpretation of their meaning, which we have witnessed and are witnessing, have revealed to us many interesting facts of which no trace is to be found in Thucydides or Xenophon, in Livy or Tacitus; enabling us to enrich with more than one feature the picture of private and public life which they have handed down to us. In the effort to embrace the life of ancient times as a whole, many attempts have been made to fix the exact place in it occupied by art, but those attempts have never been absolutely successful, because the comprehension of works of art, of plastic creations in the widest significance of that word, demands an amount of special knowledge which the great majority of historians are without; art has a method and language of its own, which obliges those who wish to learn it thoroughly to cultivate their taste by frequenting the principal museums of Europe, by visiting distant regions at the cost of considerable trouble and expense, by perpetual reference to the great collections of engravings, photographs, and other reproductions which considerations of space and cost prevent the savant from possessing at home. More than one learned author has never visited Italy or Greece, or has found no time to examine their museums, each of which contains but a small portion of the accumulated remains of antique art. Some connoisseurs do not even live in a capital, but dwell far from those public libraries, which often contain valuable collections, and sometimes—when they are not packed away in cellars or at the binder's—allow them to be studied by the curious.[2] The study of art, difficult enough in itself, is thus rendered still more arduous by the obstacles which are thrown in its way. The difficulty of obtaining materials for self-improvement in this direction affords the true explanation of the absence, in modern histories of antiquity, of those laborious researches which have led to such great results since Winckelmann founded the science of archæology as we know it. To be continue in this ebook...

**OCEANOGRAPHY- Volume II Mar 06 2021** Oceanography is a component of Encyclopedia of Earth and Atmospheric Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. These volumes deal with the oceans as an integrated dynamic system, characterized by a delicate, complex system of interactions among the biota, the ocean boundaries with the solid earth and the atmosphere. This set of volumes is designed to be a very authoritative reference for state-of-the-art knowledge on the various aspects such as: Physical Oceanography, Chemistry of the oceans, Biological Oceanography, Geological oceanography, Coral Reefs as a Life Supporting System, Human Uses of the Oceans, Ocean Engineering, and Modeling the Ocean System from a Sustainable Development perspective. These volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

**La triade d'Héliopolis-Baalbek, Volume 2 Dec 03 2020**

**Social History of Art, Volume 2 Oct 21 2019** First published in 1951 Arnold Hauser's commanding work presents an account of the development and meaning of art from its origins in the Stone Age through to the Film Age. Exploring the interaction between art and society, Hauser effectively details social and historical movements and sketches the frameworks in which visual art is produced. This new edition provides an excellent introduction to the work of Arnold Hauser. In his general introduction to The Social History of Art, Jonathan Harris assesses the importance of the work for contemporary art history and visual culture. In addition, an introduction to each volume provides a synopsis of Hauser's narrative and serves as a critical guide to the text, identifying major themes, trends and arguments.

**Religions of Rome: Volume 2, A Sourcebook Sep 24 2022** Volume two reveals the extraordinary diversity of ancient Roman religion. A comprehensive sourcebook, it presents a wide range of documents illustrating religious life in the Roman world - from the foundations of the city in the eighth century BC to the Christian capital more than a thousand years later. Each document is given a full introduction, explanatory notes and bibliography, and acts as a starting point for further discussion. Through paintings, sculptures, coins and inscriptions, as well as literary texts in translation, the book explores the major themes and problems of Roman religion, such as sacrifice, the religious calendar, divination, ritual, and priesthood. Starting from the archaeological traces of the earliest cults of the city, it finishes with a series of texts in which Roman authors themselves reflect on the nature of their own religion, its history, even its funny side. Judaism and Christianity are given full coverage, as important elements in the religious world of the Roman empire.

**Yearbook of the International Law Commission 1977, Vol.II, Part 2 May 20 2022** Following a request by the International Law Commission, the General Assembly, in resolution 987 (X) of 3 December 1955, requested the Secretary-General to arrange for publishing an annual publication entitled Yearbook of the International Law Commission, containing the principal documents and summary records relating to each ILC session. It has since been published annually in two volumes in respect of each

session.

**Geometry and Physics** Nov 14 2021 Nigel Hitchin is one of the world's foremost figures in the fields of differential and algebraic geometry and their relations with mathematical physics, and he has been Savilian Professor of Geometry at Oxford since 1997. *Geometry and Physics: A Festschrift in honour of Nigel Hitchin* contain the proceedings of the conferences held in September 2016 in Aarhus, Oxford, and Madrid to mark Nigel Hitchin's 70th birthday, and to honour his far-reaching contributions to geometry and mathematical physics. These texts contain 29 articles by contributors to the conference and other distinguished mathematicians working in related areas, including three Fields Medalists. The articles cover a broad range of topics in differential, algebraic and symplectic geometry, and also in mathematical physics. These volumes will be of interest to researchers and graduate students in geometry and mathematical physics.

**The Colloquia of the Hermeneumata Pseudodositheana: Volume 2, Colloquium Harleianum, Colloquium Montepessulanum, Colloquium Celtis, and Fragments** Jan 24 2020 The Colloquia are manuals written to help ancient Greeks and Romans get around in each other's languages; they contain examples of how to conduct activities like shopping, banking, visiting friends, hosting parties, taking oaths, winning lawsuits, using the public baths, having fights, making excuses and going to school. They thus offer a unique glimpse of daily life in the early Roman Empire and are an important resource for understanding ancient culture. They have, however, been unjustly neglected because until now there were no modern editions of the texts, no translations into any modern language, and little understanding of what the Colloquia are and where they come from. This book completes the task begun by Volume 1 of making the Colloquia accessible for the first time, presenting a new edition, translation and commentary of the remaining surviving texts. It is clearly written and will interest students, non-specialists and professional scholars alike.

**Handbook of Graphene** Feb 23 2020 The second volume in a series of handbooks on graphene research and applications Graphene is a valuable nanomaterial used in technology. This handbook features graphene topics related to Physics, Chemistry, and Biology. The Handbook of Graphene, Volume 2 delivers an overview on the numerous and diverse graphene research directions and innovations. The handbook covers a range of areas including graphene in optoelectronic devices and as a detector of biomolecules.

**Yearbook of the International Law Commission 2011, Vol. II, Part 2 (Chinese language)** Jun 21 2022 The Yearbook contains the official records of the International Law Commission and is an indispensable tool for the preservation of the legislative history of the documents emanating from the Commission, as well as for the teaching, study, dissemination and wider appreciation of the efforts undertaken by the Commission in the progressive development of international law and its codification. Volume II (Part Two) reproduces the edited version of the annual report of the Commission to the General Assembly.

**Structural Analysis of Historical Constructions - 2 Volume Set** Dec 23 2019 Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November, 2004 in Padova Italy. Following publications of previous seminars that were organized in Barcelona, Spain (1995 and 1998) and Guimarães, Portugal (2001), state-of-the-art information is presented in these two volumes on the preservation, protection, and restoration of historical constructions, both comprising monumental structures and complete city centers. These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures. In this respect, the papers, originating from over 30 countries, are subdivided in the following areas: Historical aspects and general methodology, Materials and laboratory testing, Non-destructive testing and inspection techniques, Dynamic behavior and structural monitoring, Analytical and numerical approaches, Consolidation and strengthening techniques, Historical timber and metal structures, Seismic analysis and vulnerability assessment, Seismic strengthening and innovative systems, Case studies. Structural Analysis of Historical Constructions is a valuable source of information for scientists and practitioners working on structure-related issues of historical constructions

**Epstein Barr Virus Volume 2** Apr 26 2020 Epstein Barr virus (EBV) was discovered as the first human tumor virus around 50 years ago. Since its discovery in Burkitt's lymphoma it has been associated with various other malignancies, infectious mononucleosis and even autoimmune diseases. The two book volumes on EBV summarize the first 50 years of research on this tumor virus, starting with historical perspectives on discovery, oncogenicity and immune control, reviewing the role that the virus plays in the various associated diseases and concluding with a discussion on how the immune system keeps persistent EBV infection under control in healthy EBV carriers and can be used to treat EBV associated diseases. The respective 32 chapters are written by international experts from three continents for health care providers, biomedical researchers and patients that are affected by EBV. The assembled knowledge should help to understand EBV associated diseases better and to develop EBV specific vaccination in the near future.

**Indian Trade Journal** May 08 2021

**Egyptology: Volume 2 Literatur** Jun 09 2021

**Napoleon Volume 2** Jun 16 2019 Napoleon's life reached its most extraordinary stage, between 1805 and 1810. In 1805, Napoleon was suddenly at war with Britain, Russia, and Austria. He mobilised all his power to confront them, unleashing his magnificent Grande Armée. Its first, resounding victory at Austerlitz was followed by a whirlwind of campaigns, bringing Napoleon and his men to the borders of Russia. These stunning triumphs made Napoleon the master of the continent, but they left Britain unbowed. In the years that followed, this struggle with Britain came to dominate Napoleon's actions, leading him into the bloodbath of the Spanish Peninsular war, and his attempt to blockade Europe against British commerce. In 1809, Austria launched yet another assault on him. By 1810, Napoleon had routed them, and divorced Josephine in order to marry the daughter of the Austrian Emperor. But at a time of such victory, his own family was torn asunder in the struggle for survival.

**Chemistry for JEE (Main & Advanced) Volume 2 (Class XII) by Career Point, Kota** Jul 10 2021 Chemistry for JEE (Main & Advanced) Volume 2 (Class XII) has been designed in keeping with the needs and expectations of students appearing for JEE Main. Its coherent presentation and compatibility with the latest prescribed syllabus and pattern of JEE (as per the latest NTA notification) will prove extremely useful to JEE aspirants. Questions in this book are handpicked by experienced faculty members of Career Point to enhance the following skills of the students – 1. Understanding of concepts and their application to the grass-root level. 2. Improving their scoring ability & accuracy by providing an opportunity to practice a variety of questions. Features of Book are:- · 2700+ Questions with explanatory Solutions · Chapters according to NCERT · All Types of MCQs based on latest pattern · Previous Year Questions since 2005 · 3 Mock Tests for Final Touch

**New York Court Rules Annotated (Volume 2: Court Administration)** Sep 19 2019 Volume 2 Court Administration Rules of court governing trial procedure in New York have increasingly become more critical in recent years as the courts use the rules to alter court procedure, rather than seeking changes through the legislature. LexisNexis New York Court Rules Annotated offers practitioners the rules they need, organized to accommodate quick reference by trial attorneys. Plus, the rules are fully annotated, providing practitioners the key insights in how courts will apply and interpret the procedural dictates. LexisNexis is the only provider of annotated New York rules of court, and New York Court Rules Annotated is the best source for fully annotated court rules in New York.

**Nuclear and Radiochemistry, 2 Volume Set** Feb 05 2021 The third edition of this classic in the field is completely updated and revised with approximately 30% new content so as to include the latest developments. The handbook and ready reference comprehensively covers nuclear and radiochemistry in a well-structured and readily accessible manner, dealing with the theory and fundamentals in the first half, followed by chapters devoted to such specific topics as nuclear energy and reactors, radiotracers, and radionuclides in the life sciences. The result is a valuable resource for both newcomers as well as established scientists in the field.

**Quantum Cosmology - The Supersymmetric Perspective - Vol. 2** Nov 21 2019 We read in order to know we are not alone, I once heard, and perhaps it could also be suggested that we write in order not to be alone, to endorse, to promote continuity. The idea for this book took about 10 years to materialize, and it is the author's hope that its content will constitute the beginning of further explorations beyond current horizons. More speci cally, this book appeals to the reader to engage upon and persevere with a journey, moving through the less well explored territories in the evolution of the very early universe, and pushing towards new landscapes. P- haps, during or after consulting this book, this attitude and this willingness will be embraced by someone, somewhere, and this person will go on to enrich our quantum cosmological description of the early universe, by means of a clearer supersymm- ric perspective. It is to these creative and inquisitive 'young minds' that the book is addressed. The reader will not therefore nd in this book all the answers to all the problems regarding a supersymmetric and quantum description of the early universe, and this remark is substantiated in the book by a list of unresolved and challenging problems, itself incomplete.

**Studies of the Greek Poets (Vol II of 2)** Mar 18 2022 Reproduction of the original: Studies of the Greek Poets (Vol II of 2) by John Addington Symonds

**Religions of Rome: Volume 2, A Sourcebook** Dec 15 2021 This book presents a wide range of documents illustrating religious life in the Roman world from the early Republic to the late Empire.

**Mushrooms traded as food. Vol II sec 2** Apr 19 2022 Mushrooms recognised as edible have been collected and cultivated for many years. In the Nordic countries, the interest for eating mushrooms has increased. In order to ensure that Nordic consumers will be supplied with safe and well characterised, edible mushrooms on the market, this publication aims at providing tools for the in-house control of actors producing and trading mushroom products. The report is divided into two volumes: a. Volume I: "Mushrooms traded as food - Nordic questionnaire and guidance list for edible mushrooms suitable for commercial marketing b. Volume II: Background information, with general information in section 1 and in section 2, risk assessments of more than 100 mushroom species All mushrooms on the lists have been risk assessed regarding their safe use as food, in particular focusing on their potential content of bioactive constituents.

**A History of the Laws of War: Volume 2** May 28 2020 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day. Relying on written records from as far back as 2400 BCE, and using sources ranging from the Bible to Security Council Resolutions, the author pieces together the history of a subject which is almost as old as civilisation itself. The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them, protecting civilians who are either inadvertently or intentionally caught up between them, and controlling the use of particular classes of weapons that may be used in times of conflict. Thus it is that this work is divided into three substantial parts: Volume 1 on the laws affecting combatants and captives; Volume 2 on civilians; and Volume 3 on the law of arms control. This second book on civilians examines four different topics. The first topic deals with the targeting of civilians in times of war. This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas, and attempts to prevent their indiscriminate utilisation have struggled to keep pace. The second topic concerns the destruction of the natural

environment, with particular regard to the utilisation of starvation as a method of warfare, and unlike the first topic, this one has rarely changed over thousands of years, although contemporary practices are beginning to represent a clear break from tradition. The third topic is concerned with the long-standing problems of civilians under the occupation of opposing military forces, where the practices of genocide, collective punishments and/or reprisals, and rape have occurred. The final topic in this volume is about the theft or destruction of the property of the enemy, in terms of either pillage or the intentional devastation of the cultural property of the opposition. As a work of reference this set of three books is unrivalled, and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself.

*Foundations of Applied Mathematics, Volume 2* Sep 12 2021 In this second book of what will be a four-volume series, the authors present, in a mathematically rigorous way, the essential foundations of both the theory and practice of algorithms, approximation, and optimization—essential topics in modern applied and computational mathematics. This material is the introductory framework upon which algorithm analysis, optimization, probability, statistics, machine learning, and control theory are built. This text gives a unified treatment of several topics that do not usually appear together: the theory and analysis of algorithms for mathematicians and data science students; probability and its applications; the theory and applications of approximation, including Fourier series, wavelets, and polynomial approximation; and the theory and practice of optimization, including dynamic optimization. When used in concert with the free supplemental lab materials, *Foundations of Applied Mathematics, Volume 2: Algorithms, Approximation, Optimization* teaches not only the theory but also the computational practice of modern mathematical methods. Exercises and examples build upon each other in a way that continually reinforces previous ideas, allowing students to retain learned concepts while achieving a greater depth. The mathematically rigorous lab content guides students to technical proficiency and answers the age-old question “When am I going to use this?” This textbook is geared toward advanced undergraduate and beginning graduate students in mathematics, data science, and machine learning.

*Noctua - volume IV/1-2 (2017)* Jul 18 2019

*Linus Pauling — Selected Scientific Papers* Mar 26 2020 Linus Pauling wrote a stellar series of over 800 scientific papers spanning an amazing range of fields, some of which he himself initiated. This book is a selection of the most important of his writings in the fields of quantum mechanics, chemical bonding (covalent, ionic, metallic, and hydrogen bonding), molecular rotation and entropy, protein structure, hemoglobin, molecular disease, molecular evolution, the antibody mechanism, the molecular basis of anesthesia, orthomolecular medicine, radiation chemistry?biology, and nuclear structure. Through these papers the reader gets a fresh, unfiltered view of the genius of Pauling's many contributions to chemistry, chemical physics, molecular biology, and molecular medicine.

**Problems in Physical Chemistry JEE Main and Advanced Volume 2** Oct 13 2021 1. The book is prepared for the problem solving in chemistry 2. It is divided into 5 chapters 3. Each chapter is typically divided into quick theory, Immediate Test and Knowledge Confirmation Test 4. At the end of the each chapter cumulative exercises for JEE Main & Advanced for practice 5. ‘Acid Test for JEE Mains & Advance’ containing all types of questions asked in JEE A common phrase among JEE Aspirants that chemistry is the most scoring subject, but the problems asked in JEE Exams are not directly related but they are based on multiple applications. Introducing the all new edition of “Problem Physical Chemistry JEE Main & Advanced Volume – 2” which is designed to develop the use of the concepts of chemistry in solving the diversified problems as asked in JEE. The book divides the syllabus into 5 chapters and each chapter has been typically divided in quick theory, different types of Solved Examination, followed by ‘Immediate Test’ along with the Topicwise short exercises ‘Knowledge Confirmation Test’. At the end of each chapter there are separate cumulative exercises for JEE Main & Advanced, ‘Acid Test for JEE Mains & Advance’ are also provided containing all types of questions asked in JEE. Detailed and explanatory solutions provided to all the questions for the better understanding. TOC Solid State, Solution and Colligative Properties, Electrochemistry, Chemical Kinetics, Surface Chemistry

*Design Theory: Volume 2* Aug 11 2021 This is the second edition of the standard text on design theory. Exercises are included throughout, and the book concludes with an extensive and updated bibliography of well over 1800 items.

**Yearbook of the International Law Commission 1996, Vol.II, Part 2** Jul 22 2022 Issued four times a year, this publication provides data for assessing demographic and economic trends in countries and areas of the Asia and the Pacific region. Data presented for multiple years on a month-by-month basis, facilitate comparative studies.

*Miller's Anesthesia, 2-Volume Set E-Book* Nov 02 2020 Covering everything from historical and international perspectives to basic science and current clinical practice, *Miller's Anesthesia, 9th Edition*, remains the preeminent reference in the field. Dr. Michael Gropper leads a team of global experts who bring you the most up-to-date information available on the technical, scientific, and clinical issues you face each day – whether you're preparing for the boards, studying for recertification, or managing a challenging patient care situation in your practice. Includes four new chapters: Clinical Care in Extreme Environments: High Pressure, Immersion, and Hypo- and Hyperthermia; Immediate and Long-Term Complications; Clinical Research; and Interpreting the Medical Literature. Addresses timely topics such as neurotoxicity, palliation, and sleep/wake disorders. Streamlines several topics into single chapters with fresh perspectives from new authors, making the material more readable and actionable. Features the knowledge and expertise of former lead editor Dr. Ronald Miller, as well as new editor Dr. Kate Leslie of the University of Melbourne and Royal Melbourne Hospital. Provides state-of-the-art coverage of anesthetic drugs, guidelines for anesthetic practice and patient safety, new techniques, step-by-step instructions for patient management, the unique needs of pediatric patients, and much more – all highlighted by more than 1,500 full-color illustrations for enhanced visual clarity.

*MEDICAL AND HEALTH SCIENCES - Volume II* Jan 04 2021 Medical and Health Sciences is a component of Encyclopedia of Biological, Physiological and Health Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. These volume set contains several chapters, each of size 5000-30000 words, with perspectives, applications and extensive illustrations. It carries state-of-the-art knowledge in the fields of Medical and Health Sciences and is aimed, by virtue of the several applications, at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

*Vertiebene Vernunft - Vol. 2* Apr 07 2021

**Houben-Weyl Methods of Organic Chemistry Vol. XVI/2 - Part a, 4th Edition** Oct 25 2022 Houben-Weyl is the acclaimed reference series for preparative methods in organic chemistry, in which all methods are organized according to the class of compound or functional group to be synthesized. The Houben-Weyl volumes contain 146 000 product-specific experimental procedures, 580 000 structures, and 700 000 references. The preparative significance of the methods for all classes of compounds is critically evaluated. The series includes data from as far back as the early 1800s to 2003. // The content of this e-book was originally published in 1987.

**The Syntactic Phenomena of English, Volume 2** Jun 28 2020 This second edition of James D. McCawley's classic textbook offers in one volume a complete course in the syntactic structure of English. New to this edition are sections on appositive constructions, parasitic gaps, contrastive negation, and comparative conditional sentences, as well as expanded coverage of cleft sentences and free relatives. The presentation is coherent, comprehensive, and systematically organized, beginning with an overview of McCawley's approach to syntactic analysis and progressing through the major constructions and processes of English grammar. No prior special knowledge of syntax is presupposed, and the number and variety of exercises after each chapter have been increased. And now available from the author! Answers to Selected Exercises. Instructors using James D. McCawley's *The Syntactic Phenomena of English, Second Edition* may request a complimentary copy of Answers to Selected Exercises in *The Syntactic Phenomena of English* by writing on their department's letterhead to the author, James D. McCawley, Department of Linguistics, 1010 E. 59th Street, Chicago, IL 60637.

[Note: This material is available only from the author and is not available from the University of Chicago Press.]

**Phenomenology 2005. Volume 4: Selected Essays from Northern Europe, part 2** Feb 17 2022

**The Last Lion: Volume 2** Jul 30 2020 The second volume of William Manchester's masterful account of Winston Churchill's life. Alone is the second volume of William Manchester's brilliant three-volume biography of Winston Churchill. In this volume, we witness the war within, before the colossal war to come. During this period, Churchill was tested as few men are: relentlessly pursued by creditors, disowned by his own party, vociferously dismissed by the press as a warmonger, and twice nearly lost his seat in Parliament. Yet despite his personal and political troubles, Churchill managed to assemble a vast, underground intelligence network—both within the British government and on the continent—which provided him with more complete and accurate information on Germany than the British government. Recognizing the horrifying truth, Churchill stood almost alone against Nazi aggression and the sordid British and French policy of appeasement. Manchester's luminous portrait never loses sight of Churchill the man—a man with limitations, especially his callousness toward others (including his supporters) and his recklessness, which could border on the foolhardy; but also a man whose vision was global and whose courage was boundless. Here is Churchill as a light in the approaching darkness, readying himself for the terrible stand to come.
