The Strategy-focused Organization Oct 28 2022 In today's business environment, strategy has never been more important. Yet research shows that most companies fail to execute strategy successfully. Behind this abysmal track record lies an undeniable fact: many companies continue to use management processes-top-down, financially driven, and tactical-that were designed to run yesterday's organizations. Now, the creators of the revolutionary performance management tool called the Balanced Scorecard introduce a new approach that makes strategy a continuous process owned not just by top management, but by everyone. In The Strategy-Focused Organization, Robert Kaplan and David Norton share the results of ten years of learning and research into more than 200 companies that have implemented the Balanced Scorecard. Drawing from more than twenty in-depth case studies-including Mobil, CIGNA, Nova Scotia Power, and AT T Canada-Kaplan and Norton illustrate how Balanced Scorecard adopters have taken their groundbreaking tool to the next level. These organizations have used the scorecard to create an entirely new performance management framework that puts strategy at the center of key management processes and systems. Kaplan and

Norton articulate the five key principles required for building Strategy-Focused Organizations: (1) translate the strategy to operational terms, (2) align the organization to the strategy, (3) make strategy everyone's everyday job, (4) make strategy a continual process, and (5) mobilize change through strong, effective leadership. The authors provide a detailed account of how a range of organizations in the private, public, and nonprofit sectors have deployed these principles to achieve breakthrough, sustainable performance improvements. Presenting a practical, proven framework steeped in rich case study experience, The Strategy-Focused Organization helps solve a universal management problem-not just how to formulate strategy, but how to make it work. Building on one of the most revolutionary business ideas of our time, this important book shows how today's leaders can shape their own companies to meet the challenges and reap the rewards of a new competitive era. Robert S. Kaplan is the Marvin Bower Professor of Leadership Development at Harvard Business School. David P. Norton is President of Balanced Scorecard Collaborative, Inc.

China's Strategic Priorities Mar 21 2022 The People's Republic of China is the

world's most populous state and largest consumer of energy, having demonstrated momentous progress on an unprecedented scale. This global power has increasingly shaped international relations as a result of its population size, economic development and political character. Identifying the most significant new issues and problems that have arisen from China's rapid development, this book examines the evolution of China's contemporary foreign policy and international relations. In doing so, it underlines the global importance of China's management of its own politics and economics, and demonstrates how all nation-states have a vested interest in –and to varying degrees are liable for –the consequences of Chinese actions. The book aims to spark debate by drawing attention to these critical issues; placing them on the scholarly agenda as well as that of the practitioner. It provides factual evidence, progressive findings, justification and a rationale for action, expert analysis, and the resulting policy prescriptions. In addition, the book highlights the liable costs of failing to address China's strategic priorities. This interdisciplinary book draws attention to the most pressing issues that China must address for universal benefit, and will be of great interest to students and scholars of International Relations, Chinese Studies and Political Science.

The Blendification System Nov 17 2021 Shelving Guide: Business and Management / Strategic Planning / Leadership / Operations Culture, Strategy, Execution. These three components forge the path to realized potential. The Blendification® System breaks down and rebuilds these core concepts within your company's DNA, setting the foundation for an energizing, engaging, and impactful organization. It is based on the belief that many organizations fail to maximize their potential because they simply do not comprehend the magnitude of their personal and collective untapped capabilities. Many workplaces are stuck in "second gear," not quite embracing and pursuing their full potential. Corporate missions are based on market dominance and incremental profit growth, leaving a massive blind spot in terms of the connection between employees, customers, and communities. This short-sightedness may provide a clear focal point, but it leaves the company, its leadership, and its employees with limited sustained motivation to realize potential. The Blendification® System embraces the connection between culture, strategy, and execution using the Strategy Whiteboard and integrating emotional and system intelligence into the following three-step model: Strategic Analysis including Culture Strategic Focus, Strategic Outcomes, and Strategic Actions Strategic Execution The Blendification® System connects culture, strategy, and execution in a meaningful way that fosters an inspired, exceptional workforce. By focusing on the unifying purpose within each organization, the platform promotes alignment between leadership and employees setting a clear, strong foundation in which every individual can thrive. With this foundation in place, organizations activate their employee's potential who then take care of their customers. By fully engaging those with whom organizations directly interact, these individuals then become the spark that ignites community-wide advancement. This is not a theory-based, philosophical book. This is an in-depth operating system by which organizations reshape their infrastructure to realize potential. The methodology outlined in The Blendification® System creates agile

and efficient action, maximizing success in periods of economic expansion and times of uncertainty such as the COVID-19 outbreak, the Great Recession, and 9/11. By following the structure outlined in The Blendification® System and using the Strategy Whiteboard, organizations will move beyond financial success to uplifting employees, customers, and entire communities.

To evaluate 'demerger' as a strategic objective Dec 26 2019

Inhaltsangabe:Abstract: In general, the focus of an investigation an demerger Gould range from its economic implications to its political, social, legal or business implications. However, it seems reasonable to conduct an early investigation of demerger not from an economic, political or social viewpoint, since there has not been enough demerger activity yet to evaluate its greater economic, political or social implications. Therefore, this paper will try to evaluate demerger from a company's point of view. Le., to look at demerger from a corporate strategy angle. In this context it is also regarded necessary to take some of its legal background into consideration. To evaluate'demerger' as one strategic objective for a company's management, the trst aim of this dissertation shall be to detect evidence regarding underlying 'demerger' rationales of the past. Therefore, the question: What are the reasons for conducting a demerger ? will be addressed. Furthermore, since demerger can only be regarded as a strategic objective if it actually improves the chances of a company to enhance its future position and prospects, it is necessary to raise two further questions. Hence, derived from the evidence found, the author will address the questions: What are the benefits associated with demerger ? and What are the problems which appear to be involved ih demerger ? The second aim of this dissertation will consequently be to find answers to these questions. This will lead to a better understanding of the reasons why some corporate managers consider'demerger' as an appropriate strategic mean, while others still seem to be hesitant about it. Please acknowledge that the analysis of the 'demerger' Gases conducted in this dissertation cannot be representative since it only refers to certain UK demergers'. An analysis that covers a wider scope Gould not be conducted. This was due to the limited timeframe which was set for this dissertation. However, the empirical evidence displayed in this paper will introduce findings of 'demerger' studies which have the necessary scope and depth to be interpreted as representative.

Cambridge Handbook of Organizational Project Management Sep 03 2020 In recent years, organizational project management (OPM) has emerged as a field focused on how project, program and portfolio management practices strategically help firms realize organizational goals. There is a compelling need to address the totality of project-related work at the organizational level, providing a view of organizations as a network of projects to be coordinated among themselves, integrated by the more permanent organization, and to move away from a focus on individual projects. This comprehensive volume provides views from a wide range

of international scholars researching OPM at a cross-disciplinary level. It covers concepts, theories and practices from disciplines allied to management, such as strategic management, organization sciences and behavioural science. It will be a valuable read for scholars and practitioners alike, who are looking to enrich their understanding of OPM and further investigate this new phenomenon.

***Strategic Priorities for Agricultural Development in Eastern and Central Africa
Aug 14 2021 If agriculture in Eastern and Central Africa remains in its current state, not a single nation in the region will achieve the Millennium Development Goal of halving poverty by 2015. In the hopes of averting such a dismal outcome, this report analyzes agricultural development priorities and investment patterns in the region and their impact on growth and poverty rates, seeking an improved agricultural strategy. Using the Dynamic Research Evaluation for Management (DREAM) model and other tools to evaluate opportunities for increasing both agricultural and overall economic growth, the authors offer alternatives to the status quo. They propose approaches such as tailoring agricultural production to demand within Eastern and Central Africa, encouraging a wide variety of agricultural production to match the diversity of national demands and capacities, and promoting regional cooperation in agricultural development. Their analysis and conclusions should interest specialists in agricultural policy and investments, particularly those concerned with the impact of both on poverty reduction.***

Strategy as Leadership Oct 24 2019 Strategy as Leadership is about making sense of predictable but drastic changes that can alter the relationship between businesses and their competition, posing substantial leadership challenges to senior management teams. Roberto S. Vassolo and Natalia Weisz provide a framework to address and respond to these critical changes by identifying them,

describing the inner tensions these changes generate, and providing guidance for their successful navigation. This outside-in approach specifies the salient leadership challenges that executives will face while mobilizing their organizations to respond effectively to competitive and environmental change. This book claims that strategy is leadership as, in this framework, these environmental changes demand shifts in strategic priorities that result in a consistent pattern of resistance. If we know that changes are occurring in the competitive environment, we can soon identify who will be most resistant to the shift in priorities necessary to address the new situation. This book is for senior management teams to enable their organizations' capabilities to adapt and address environmental changes successfully.

Corporate Governance in Tanzania Aug 22 2019 Increasingly the importance of corporate governance for economic development in developing economies like Tanzania is indisputable. This book explores the effectiveness of corporate governance in Tanzania and asks how it can be further developed and improved so as to make a difference in the contribution of state-owned enterprises to the economy. The book tries as fairly as possible to probe further into effective corporate governance, using cases of public entities, highlighting shortfalls in their governance and the consequent multiplier effects on socio-economic life. On the other hand, the book also aims to present examples of good governance in multi-layered ways, to show that there is room for creativity and innovation in applying principles of good corporate governance. Recognising that context is crucial, the book starts by assessing Tanzania's socio-historical and economic context, and gauging various applicable metrics. Using historical and theoretical lenses, including the ethics-accountability relationship, the author aims to improve our understanding of corporate failures and consequent waste in Tanzania. Explaining failures in governance is far from straightforward, as by definition they operate beyond rules and regulations, systems and processes, yet the author draws from decades of local experience and expertise in order to assess the real situation on the ground. The Tanzania case will be of considerable interest to researchers looking at questions of corporate governance and economic development both within the country itself, and across Africa.

Beyond Strategic Vision Aug 26 2022 Hoshin is a system which was developed in Japan in the 1960's, and is a derivative of Management By Objectives (MBO). It is a Management System for determining the appropriate course of action for an organization, and effectively accomplishing the relevant actions and results. Having recognized the power of this system, Beyond Strategic Vision tailors the Hoshin system to fit the culture of North American and European organizations. It is a "how-to" guide to the Hoshin method for executives, managers, and any other professionals who must plan as part of their normal job. The management of an organization, whether it be large or small, has as one of its principal responsibilities setting the direction of the organization for the future. The most effective way to set the future direction is to develop a shared vision of what the organization will be in the future, contrast it to the way the organization is now, and then to create a plan for bridging the gap: the Strategic Plan. Beyond Strategic Vision shows you how to do this effectively and efficiently. Michael Cowley has been a teacher and practitioner of management and strategic planning methodologies since 1972. He is a certified instructor for GOAL/QPC and has worked with a wide variety of clients in the automotive, manufacturing, financial, military, healthcare, and educational fields.
