**Godly Learning** Mar 09 2021 Godly Learning attempts to establish the relationship which Puritans worked out between faith and reason in the eighty years before the Civil War. This was a period of rapid expansion of educational facilities, of a clash between humanist values of the Renaissance and the fideism of the Reformation, and of confrontations between traditionalist (primarily Aristotelian) approaches to knowledge and the more experimental path signalled by Bacon. Taking an existential approach to the question of meaning, Puritans sought their solution in the development of a covenant theology based on a life of active faith. They argued vehemently that natural reason was incapable of finding the path to salvation and only faith could regenerate reason to its proper capabilities. At the same time, Puritans emphasised the value of learning for comprehension of Scripture and preparation of sermons. Starting with a fresh approach to the question of defining Puritans, Godly Learning proceeds to delineate the infrequently studied puritan mentalité which informed the better-known public political and ecclesiological positions. Not since the work of Perry Miller has there been such a thorough attempt to comprehend the Puritan view of reason, and the implications of that view.

**Learning in the Fast Lane** May 31 2020 "More than three million high-school students take five million Advanced Placement exams each May, yet remarkably little is known about how this sixty-year-old, privately-run program, has become one of U.S. education's greatest successes. From its mid-century origin as a tiny option for privileged kids from posh schools, AP has also emerged as a booster rocket into college for hundreds of thousands of disadvantaged youngsters. It challenges smart kids, affects school ratings, affords rewarding classroom challenges to great teachers, tunes up entire schools, and draws vast support from philanthropists, education reformers and policymakers. AP stands as America's foremost source of college-level academics for high school pupils. Praised for its rigor and integrity, more than 22,000 schools now offer some-or-many-of its thirty-eight subjects, from Latin to calculus, art to computer science.

But challenges abound today, as AP faces stiffening competition (especially dual credit), curriculum wars, charges of elitism, misgivings by elite schools and universities, and the arduous work of infusing rigor into schools that lack it and academic success into young people unaccustomed to it. In today's polarized climate, can Advanced Placement maintain its lofty standards and overcome the hostility, politics and despair that have sunk so many other bold education ventures? *Advanced Placement: The Unsung Success Story of American Education* is a unique account-richly documented and thoroughly readable-of the AP program in all its strengths and travails, written by two of America's most respected education analysts"--

**Supporting Lifelong Learning** Jul 01 2020 This volume of the Open University Reader for Supporting Lifelong Learning looks at policy development in lifelong learning at local, regional, national and supra-national levels. Using an international team of contributors, it explores and examines the policy context for lifelong learning, the policies themselves, and their effects when implemented. The book focuses on the role of lifelong learning policy in relation to issues of competitiveness, technological change and social inclusion. The provision of a range of chapters from around the globe uniquely establishes a comparative basis for the reader. This volume also encourages the student to evaluate lifelong learning as a response to globalising trends and the globalising of educational policy.

**ICT-Based Assessment, Methods, and Programs in Tertiary Education** Aug 22 2019 The use of information and communication technologies (ICTs) in education has revolutionized learning. Shifting beyond traditional mode of education, the integration of ICTs has become an advantage for students at tertiary education when used for the right purpose to enhance learning. The use of technology brings

forth a flexible and accessible mode of education and bridges the gap of learning across borders. This enables students at tertiary level to have access to other universities and academic resource materials globally, thereby expanding their knowledge. Thus, it is crucial to consider the development of technology in education as part of a comprehensive pedagogical framework and take into account new developments in ICTs. *ICT-Based Assessment, Methods, and Programs in Tertiary Education* is an essential research publication that provides relevant theoretical frameworks and recent empirical research findings on integrating ICTs in tertiary education to enhance learning and allow students to take more control of their learning. Highlighting topics such as assessment, language learning, and e-learning, this book is ideal for teachers, professionals, academicians, researchers, administrators, curriculum designers, instructional designers, and students.

**Henry VIII** Sep 03 2020 Few historical figures are as familiar as King Henry VIII. Few kings have popular images created out of so much misinformation: that he was short, had six wives and a legion of mistresses, contracted syphilis and became a Protestant. Henry was a maze of contradictions and the object of much contemporary praise and criticism, adulation and condemnation. He had impressive strengths but also formidable weaknesses, amongst them inconstancy, financial irresponsibility, and a capacity for brutality. At the same time, his rule was vibrant, often exciting and dramatic, and of major significance for England's future. Michael Graves examines this complex personality and sorts out the reality from the myths to provide a highly readable study of early modern kingship as practised by one man.

**A New England?** Jun 19 2019 G. R. Searle's absorbing narrative history breaks conventional chronological barriers to carry the reader from England in 1886, the apogee of the Victorian era with the nation poised to celebrate the empress queen's golden jubilee, to 1918, as

the 'war to end all wars' drew to a close leaving England to come to term with its price - above all in terms of human life, but also in the general sense that things would never be the same again. This was an age of extremes: a period of imperial pomp and circumstance, with a political elite preoccupied with display and ceremony, alongside the growing cult of the simple life; the zenith of imperialism with its idealization of war on the one hand, the start of the Labour Party, a socialist renaissance, and welfare politics on the other; and a radical challenging of traditional gender stereotypes in the face of the prevailing cult of masculinity. Under Professor Searle's historical microscope, all the details of daily life spring into sharp relief. Half-forgotten figures such as Edward Carpenter, Vesta Tilley, and Sir Henry Campbell-Bannerman take their place on stage beside Oscar Wilde, the Pankhursts, and Lloyd George. Motoring and aviation, to become such an intrinsic part of life within the next decades, had their beginnings in this period as pastimes for the rich. From the wretched slums of England's great cities to their bustling docks and factories, from the grand portals of Westminster to the violent political challenges of the Ulster Unionists and the militant suffrage movement, from Blackpool's tower and beach packed with holidaymakers to the trenches of the Western Front, the energy, creativity, and often destructive turmoil of the years 1886-1918 are brought into focus in this magisterial history.

THE NEW OXFORD HISTORY OF ENGLAND

The aim of the New Oxford History of England is to give an account of the development of the country over time. It is hard to treat that development as just the history which unfolds within the precise boundaries of England, and a mistake to suggest that this implies a neglect of the histories of the Scots, Irish, and Welsh. Yet the institutional core of the story which runs from Anglo-Saxon times to our own is the story of a state-structure built round the English monarchy and its effective successor, the Crown in Parliament. While the emphasis of individual volumes in the series will vary, the ultimate outcome is intended to be a set of standard and authoritative histories, embodying the scholarship of a generation.

**A Board Game Education** May 11 2021 A Board Game Education is an entertaining and valuable resource for parents, teachers, educators, and anyone who appreciates the fun and entertainment

provided by classic, traditional board games. The book provides an informative analysis of how classic board games that everyone has played—and probably owns—are not only great family entertainment but also develop core educational skills that have been proven to lead to academic achievement. Through *A Board Game Education* readers learn a bit of the fascinating history trivia and little-known facts regarding the most loved board games of all time (i.e., how Monopoly was used by WWII POWs to escape). At the same time, Hinebaugh identifies the distinct educational skills developed by each of these games and explores in detail how the play of these games cultivates such skills. *A Board Game Education* also provides valuable suggestions about how to modify and vary these classic board games to specifically enhance additional core educational skills and concepts. Who would have thought that Candy Land could be modified into a strategy game and Chutes and Ladders could be used to teach algebraic equations and advanced math.

**In Triumph's Wake** Feb 20 2022 The powerful and moving story of three royal mothers whose quest for power led to the downfall of their daughters. Queen Isabella of Castile, Empress Maria Theresa of Austria, and Queen Victoria of England were respected and admired rulers whose legacies continue to be felt today. Their daughters—Catherine of Aragon, Queen of England; Queen Marie Antoinette of France; and Vicky, the Empress Frederick of Germany—are equally legendary for the tragedies that befell them, their roles in history surpassed by their triumphant mothers. *In Triumph's Wake* is the first book to bring together the poignant stories of these mothers and daughters in a single narrative. Isabella of Castile forged a united Spain and presided over the discovery of the New World, Maria Theresa defeated her male rivals to claim the Imperial Crown, and Victoria presided over the British Empire. But, because of their ambition and political machinations, each mother pushed her daughter toward a marital alliance that resulted in disaster. Catherine of Aragon was cruelly abandoned by Henry VIII who cast her aside in search of a male heir and tore England away from the Pope. Marie Antoinette lost her head on the guillotine when France exploded into Revolution and the Reign of Terror. Vicky died grief-stricken, horrified at her inability to prevent her son, Kaiser Wilhelm,

from setting Germany on a belligerent trajectory that eventually led to war. Exhaustively researched and utterly compelling, *In Triumph's Wake* is the story of three unusually strong women and the devastating consequences their decisions had on the lives of their equally extraordinary daughters.

**Mapping the Terrain of Education Reform** Feb 08 2021 This book envisions the formulation of critical perspectives on education reform using the Philippine experience, recognizing the need to address relevant issues and challenges particularly in an increasingly globalized twenty-first century setting. A specific education reform project, the Leaders and Educators in Asia Programme (LEAP), a joint effort between the Philippines' Department of Education, the Ateneo de Manila University in the Philippines, the National Institute of Education-Singapore and Singapore's Temasek Foundation, serves as the analytical focus of how education reform as a globalized movement is implemented, interpreted and made sense of by stakeholders involved in the reform project. This inquiry proposes to examine the problematique of education reform – from a Philippine perspective – by focusing on three analytical starting points: (1) describing the most relevant and urgent issues of education reform; (2) diagnosing the causes and consequences of reform failures; and (3) developing critical and contextualized perspectives on reform trajectories. *Mapping the Terrain of Education Reforms: Global trends and local responses in the Philippines* discusses the following: Challenges against effective education reforms The oscillation

between global and local imperatives The dissociation between policymakers and practitioners Education reform aid in the Philippines This book will be of interest to researchers interested in education policy, politics, and reforms. It will also appeal to scholars examining Asian, and particularly Southeast Asian, educational systems.

*Indentured Students* Nov 05 2020 The untold history of how America's student-loan program turned the pursuit of higher education into a pathway to poverty. It didn't always take thirty years to pay off the cost of a bachelor's degree. Elizabeth Tandy Shermer untangles the history that brought us here and discovers that the story of skyrocketing college debt is not merely one of good intentions gone wrong. In fact, the federal student loan program was never supposed to make college affordable. The earliest federal proposals for college affordability sought to replace tuition with taxpayer funding of institutions. But Southern whites feared that lower costs would undermine segregation, Catholic colleges objected to state support of secular institutions, professors worried that federal dollars would come with regulations hindering academic freedom, and elite-university presidents recoiled at the idea of mass higher education. Cold War congressional fights eventually made access more important than affordability. Rather than freeing colleges from their dependence on tuition, the government created a loan instrument that made college accessible in the short term but even costlier in the long term by charging an interest penalty only to needy students. In the mid-1960s, as bankers wavered over the prospect of uncollected debt, Congress backstopped the loans, provoking runaway inflation in college tuition and resulting in immense lender profits. Today 45 million Americans owe more than \$1.5 trillion in college debt, with the burdens falling disproportionately on borrowers of color, particularly women. Reformers, meanwhile, have been frustrated by colleges and lenders too rich and powerful to contain. *Indentured Students* makes clear that these are not unforeseen consequences. The federal student loan system is working

as designed.

Learning Languages in Early Modern England Aug 14 2021 In 1578, the Anglo-Italian author, translator, and teacher John Florio wrote that English was 'a language that wyl do you good in England, but passe Dover, it is woorth nothing'. *Learning Languages in Early Modern England* is the first major study of how English-speakers learnt a variety of continental vernacular languages in the period between 1480 and 1720. English was practically unknown outside of England, which meant that the English who wanted to travel and trade with the wider world in this period had to become language-learners. Using a wide range of printed and manuscript sources, from multilingual conversation manuals to travellers' diaries and letters where languages mix and mingle, *Learning Languages* explores how early modern English-speakers learned and used foreign languages, and asks what it meant to be competent in another language in the past. Beginning with language lessons in early modern England, it offers a new perspective on England's 'educational revolution'. John Gallagher looks for the first time at the whole corpus of conversation manuals written for English language-learners, and uses these texts to pose groundbreaking arguments about reading, orality, and language in the period. He also reconstructs the practices of language-learning and multilingual communication which underlay early modern travel. *Learning Languages* offers a new and innovative study of a set of practices and experiences which were crucial to England's encounter with the wider world, and to the fashioning of English linguistic and cultural identities at home. Interdisciplinary in its approaches and broad in its chronological and thematic scope, this volume places language-learning and multilingualism at the heart of early modern British and European history.

*Synergic Integration of Formal and Informal E-Learning Environments for Adult Lifelong Learners Apr 10 2021* Recently, there has been an increased understanding that learning occurs outside of the traditional classroom setting, particularly for adult lifelong learners. This perspective has enhanced an attentive design in the underlying

technological architecture that is required for the integration of formal and informal learning environments. Synergic Integration of Formal and Informal E-Learning Environments for Adult Lifelong Learners presents a collection of issues and research from adult education professionals who define, develop, implement, and evaluate the integration of formal and informal eLearning environments for adult lifelong learners. Academics, teachers, administrators, and learning technologists will benefit from this publication's unique approach to discussing and analyzing the challenges of introducing and implementing learning technologies for adult lifelong learners.

### **Transformative Perspectives and Processes in Higher Education**

Dec 06 2020 This book aims to provide insight into the complexities confronting higher education today and to highlight tangible opportunities that exist to address such issues. We are in a constant state of flux and higher education needs to respond in more proactive, intentional and innovative ways to remain a relevant cornerstone to society and culture. The editors begin by asking how our collective reality might change if the complexity and uncertainty surrounding us were embraced and leveraged to serve the learner and society as a whole. They invite the reader to explore collaborative approaches to individualized learning pathways, networked learning and a reimagined ecosystem of academia. The chapters are arranged to inform the reader seeking knowledge on how to 1) reshape and redefine the 21st century university, with its evolving role in these transformative times; 2) design and implement courses that address the changing needs of the university and the non-traditional student; and 3) utilize research on innovative strategies with processes that promote organizational learning. The chapters profile the fluid nature of learning as it evolves in higher education and the workplace, often with a blurred line separating the two environments. Exciting ideas related to heutagogy, problem-based learning, innovative constructivist strategies, authentic learning and self-regulated learning all converge in this volume.

*Trademarks and Unfair Competition* Aug 02 2020 This widely used casebook, cited by the Supreme Court in its *Moseley v. V Secret Catalogue* decision on trademark dilution, is authored by three of the nation's preeminent trademark practitioners and teachers. Constitutional issues--pertaining to the Commerce Clause, the Patent and Copyright Clause, the Supremacy Clause, and the First Amendment--are reshaping modern trademark law, have been outcome-determinative in many high-profile cases, and are fueling extremely influential debates in academic literature. Thus, the Seventh Edition of *Trademarks and Unfair Competition* has a newly enhanced focus on examining trademark law's place in the constitutional scheme. An entirely new chapter is devoted to the question of

trademark law's interaction with the First Amendment. Throughout the casebook, great attention is paid to the constitutional and practical relationship of trademark law with other areas of intellectual property law. The casebook provides an in-depth presentation and analysis of the principal questions and problems in trademark law today, and a synthesis of the current and developing law. The organization provides students with a foundation in the historical and normative principles that have been governed and continue to govern trademark law's evolution, before progressively exposing them to more sophisticated and specific problems. Each section begins with an introductory overview followed by tightly edited cases and a summary of the issues, with analysis through notes and other secondary textual materials. Features of this new edition include: • A new chapter on Freedom of Speech and the Law of Trademarks and Unfair Competition; • The sea change in federal dilution law caused by the Trademark Dilution Reversion Act of 2006 and the cases interpreting it; • An in-depth analysis of the new and controversial issues centered on search engines, sponsored advertising, keywords, trademark use and initial interest confusion, and the trademark and constitutional principles that underpin this contentious debate in the courts and among scholars; • The continuing evolution of the law of fair use and nominative fair use after the Supreme Court's decision in *KP Permanent Make-Up v. Lasting Impression I*, and the normative impact of free speech considerations; and • The interaction of trade dress, design patent, copyright, and their respective constitutional foundations, as discussed in the Supreme Court's *Twentieth Century Fox v. Dastar* and *Samara v. Wal-Mart* and *TraFFix Devices v. Marketing Displays* decisions and by the lower courts in their aftermath. The Documentary Supplement for Trademarks and Unfair Competition contains the following updated material: • Rules of Practice of the U.S. Patent and Trademark Office; • ICANN Uniform Domain Name Dispute Resolution Policy; • NAD / CARU / NARB Procedures; • Sample (Illinois) Right of Publicity Statute; • Trademark Law Treaty and Regulations; • Protocol Relating to the Madrid Agreement; • Paris Convention for the Protection of Industrial Property; and • Agreement on Trade-Related Aspects of Intellectual Property.

Mindfulness and Learning Jan 07 2021 In recent decades, education at all levels has been seriously impoverished by a growing obsession with standards, targets, skills and competences. According to this model, only a circumscribed range of basic cognitive skills and competences are the business of education, whose main role is to provide employability credentials for people competing for jobs in the global economy. The result is a one-dimensional, economic and bleakly utilitarian conception of the educational task. In *Mindfulness and Learning: Celebrating the Affective Dimension of Education*, Terry Hyland advances the thesis that education stands in need of a rejuvenation of its affective function – the impact it has on the emotional, social, moral and personal development of learners. Drawing on the Buddhist conception of mindfulness, he advances a powerful argument for redressing this imbalance by enhancing the affective domain of learning. *Mindfulness and Learning: Celebrating the Affective Dimension of Education* shows how the concept and practice of ‘mindfulness’ – non-judgmental, present moment awareness and experience – can enrich learning at all levels. Mindfulness thus contributes to the enhanced achievement of general educational goals, and helps remedy the gross deficiency of the affective/emotional aspects of contemporary theory and practice. The author outlines a mindfulness-based affective education (MBAE) programme and shows how it might be introduced into educational

provision from the early years to adult education with a view to harmonising the cognitive-affective balance across the system.
