[The Economics of the Popular Music Industry](#) Jan 26 2020 This Palgrave Pivot uses modeling from microeconomic theory and industrial organization to demonstrate how consumers and producers have responded to major changes in the music industry. Byun examines the important role of technology in changing its structure, particularly as new methods of creating and accessing music prove to be a double-edged sword for creators and producers. An underlying theme in the project is the question of how the business of music affects creativity, and how artists continue to produce creative output in the face of business pressures, the erosion of copyright enforcement, and rampant online piracy. In addition to being a useful resource for economists interested in the music industry, this approachable Pivot is also ideal for business and music majors studying the effect of technology on their chosen fields.

Coastal Environments in Popular Song Jun 30 2020 This book examines how popular music is able to approach subjects of bio-politics, climate change, solastalgia, and anthropomorphisation, alongside its more common diet of songs about love, dancing, and break-ups - all while satisfying its primary remit of being entertaining and listenable. Nearly a thousand books have been published on bioethics since Van Rensselaer Potter's Bioethics Bridge to the Future (1971), with a marked increase in the past 20 years. However, not one of these books has focused itself on popular music, something Christopher Partridge describes as 'central to the construction of [our] identities, central to [our] sense of self, central to [our] well-being and, therefore, central to [our] social relations'. This edited collection examines popular music through a range of topics, from romance to climate change. Coastal Environments in Popular Song is perfect for students, scholars, and researchers alike interested in bioethics, social history, and the history of music.

Sound of Music Mar 28 2020 book by Stephen Gislason emerged from his Music Notes collected over many years. The topics cover a wide range of interests from the history of instruments, music theory, composing to the most current technologies involved in music composition and sound recording. A special chapter on the Musical Brain explains current knowledge in the brain processing of sound as it applies to language and music decoding. A chapter on the Music Business reviews the dramatic changes in music marketed and discusses some of the dilemmas and controversies facing musicians. Preface This book emerged from notes I have kept for several decades. I have spent much time studying music theory, electronics applied to sound reproduction and to performance skills. I decided to assemble my music notes so that any person interested in music could benefit from simple, clear explanations. Music descriptions often are too complicated and the use of terms can be inconsistent and confusing. As with other subjects I have tackled, I assumed that with a little extra effort more precise descriptions would be welcomed by readers seeking a practical understanding of music. The book begins with a consideration of what sound is and how animals use sounds to communicate. Music is not a human invention, but we do elaborate sound communication more

than other animals in our production of both speech and musical performances. The discussion continues with noise, an important topic that is poorly understood. A well informed musician will refrain from making noise and understand Ambrose Bierce when he stated: Of all noise, music is the less offensive." I include acoustic and electronic instruments in my discussions of music creation. In my world, electronics dominate every aspect of work and play and most music I create and listen to was created, stored and distributed electronically. The art and science of recording is an important study for all 21st century musicians. Increased sophistication about the nature of sound, the art of combining musical sounds, and the effect on the listener's brain are all required for music to advance beyond noise toward a more effective means of human communication. Stephen Gislason 2016

Popular Songs and Ballads of Han China Nov 23 2019 This book, first published in 1988, compiles 77 songs and ballads (yüeh-fu) of early imperial China (200 BC – AD 300). Each song-text is newly translated and fully annotated and explicated. Dr Birrell deals systematically with problems of the earliest sources, dating, attribution, textual variants, multiforms, metre, generic title, song title and structure. This careful and thorough treatment is especially necessary for a corpus of anonymous popular texts which are often corrupt, structurally confusing, laconic and full of nonsense words and colloquialisms. Her introductory essay provides a socio-historical context for this material and charts its literary transmission, while singling out special characteristics of the genre, such as musical, oral and dramatic elements. The main text, arranged into eleven chapters plus an introduction, is supplemented by notes, appendices, maps, chronology, bibliography and index.

American Popular Song Dec 05 2020 "Composer Alec Wilder's *American Popular: The Great Innovators, 1900-1950* is widely recognized as the definitive book on American popular song. In this volume, which achieved immediate praise and recognition upon its publication, Wilder discusses some 800 songs from the *American Songbook*, offering a composer's insight, accessible music analysis, as well as his strong personal biases. Nearly fifty years later, this classic study has received a much-needed revision. While leaving Wilder's colorful prose and brazen opinions intact, language, style, and musical nomenclature have been updated to reflect current usage. The musical examples mostly remain, but piano score has been replaced with lead-sheet notation: melody, chords, and lyrics. Rhythmic notation has also been adjusted to follow present-day norms. Additionally, a final chapter has been added, which includes more than fifty songs that were not in the original, seeking to achieve greater representation for women and African American composers, as well as including several of Wilder's own songs"--

Listening to Classic American Popular Songs Apr 21 2022 In the twenties, thirties, and forties, now-legendary American songwriters and lyricists created a repertoire of popular songs, songs that have captured the hearts of generations of music lovers. George Gershwin, Richard Rodgers, Cole Porter, Jerome Kern, Harold Arlen, Hoagy Carmichael and many others, along with such lyricists as Ira Gershwin, Lorenz Hart, and Dorothy Fields, produced extraordinary songs of signal importance to the American musical heritage. In this book Allen Forte shares his love of American popular song. He discusses in detail twenty-three songs, ranging from Gershwin's "Fascinating Rhythm" (1924) to Irving Berlin's "Steppin' Out with My Baby" (1947), guiding readers and listeners toward a deeper appreciation of this vital and engaging music. Forte writes for the general reader, assuming no background other than a familiarity with basic music notation. Each song is discussed individually and includes complete lyrics and simple leadsheet notation. Forte discusses the songs' distinctive musical features and their sophisticated, often touching and witty lyrics. Readers can follow the music while they listen to the accompanying compact disc, which was specially recorded for this volume by baritone Richard Lalli and pianist-arranger Gary Chapman, with Allen Forte, pianist-arranger for "Embraceable You" and "Come Rain or Come Shine". Learn about these favorite songs and more: "How Long Has This Been Going On?" "What Is This Thing Called Love?" "Embraceable You" "Autumn in New York" "I've Got You Under My Skin" "The Nearness of You" "That Old Black Magic" "Come Rain or Come Shine"
